

DISCO Managed Review

Efficient, Accurate, Easy

"I have used five document review interfaces in my career. DISCO is the best, and it is not even close. The interface is intuitive and makes sense, so little training or troubleshooting is required. Plus, it is just fast. It takes longer to open my browser than it does to execute searches in DISCO, even in multi-terabyte matters."

— Jesse K. Bolling, Miller Barondess.

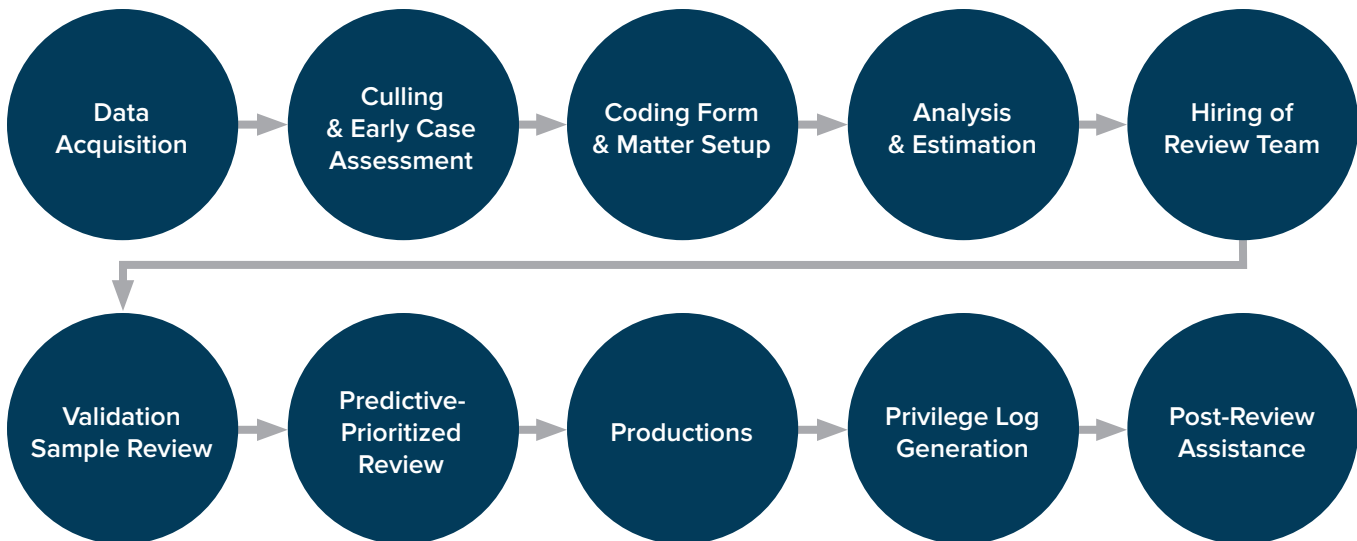

Managed Review Simplified

The benefits of using DISCO for managed review are measurable: on average 23% increase in review throughput, 32% reduction in time spent on QC, and consistent, high quality results.¹ As a single-source provider, you sign one contract and receive one invoice. DISCO handles the rest.

DISCO Managed Review includes a dedicated DISCO Project Manager who will hire and manage appropriate US-based contract attorneys, monitor the entire review process, and handle all review site logistics. With quality control tools and methodologies, Managed Review services will provide meaningful, daily progress reports. The PM will leverage DISCO's functionality to monitor the review team's work and retrain any reviewers who are utilizing certain tags outside of the team's average, or working faster or slower than expected, resulting in a comprehensive, defensible managed review solution.

DISCO combines world-class engineering with a deep love and respect for the law to deliver the best legal technology.

Data Acquisition

PM assists client in developing and executing a comprehensive, forensically sound acquisition of data.

Culling & Early Case Assessment

PM assists counsel in developing and tailoring search terms for most effective use on DISCO.

Coding Form & Matter Setup

PM works with counsel to create effective and efficient workflows. PM also consults on the most effective and efficient use of DISCO Predictive Rankings, and activates tag predictions on the appropriate tags.

Analysis & Estimation

DISCO PM provides a range of estimates for the prevalence of each tag in the entire database following review of an estimation sample.

Hiring of Review Team

PM vets, hires, and trains US-barred attorneys.

Predictive-Prioritized Review

PM creates one or more DISCO Review Stages that focus on the determined review universe. The Review Stage workflow is designed in coordination with counsel to maximize speed and effectiveness.

Validation Sample Review

A random sample is reviewed to statistically verify that the remainder of the population is virtually free of additional responsive documents.

Productions

PM creates searches that roll-up the proper production universe and assists in creating the production.

Privilege Log Generation

PM assists with generating the Privilege Log.

Post-Review Assistance

PM assists with any of the following: deposition prep, exhibit set assurance, and other post-review consulting.

As the leading provider of software as a service solutions developed by lawyers for lawyers, DISCO is reinventing legal technology to automate and simplify complex and error-prone tasks that distract from practicing law. DISCO has been embraced by more than 400 law firms, including 50 of the AmLaw 200, as their first choice for innovative technologies that help great lawyers and their teams secure justice and win cases.
