## MESSAGE FROM THE MANAGEMENT

**Commenting on the results, Mr. Krishna Bodanapu, Managing Director and Chief Executive Officer, said** "For the first time in history of the company, we crossed revenue of US\$ 100 million in a single quarter – this we have achieved without taking into account the additional revenue due to the acquisition of Softential last quarter. For the third consecutive quarter, we have shown business momentum with robust QoQ growth in revenues for the company. This gives me confidence that we have put the challenges of last year behind us and are now on a continued growth momentum. This is further confirmed by the order pipeline and backlog that is in place. While margins declined on account of the appreciation of the rupee and salary increases, I am confident that we are actively working on the levers of margin to improve the same over the course of the year, starting in Q2. We have completed the roll out of most of the Information systems and we are in the process of ensuring they are in sync and working together. I am sure that we will see a significant amount of benefit from the same going forward.

I would also like to highlight that we have completed our brand roll out in Q1 including the name change for the company on May 7, 2014. I am happy to note that this has been very well received by all stakeholders and we are seeing benefits of the same."

**Mr. Ajay Aggarwal, Chief Financial Officer, said that** "As expected, due to wage hike and exchange impact, our operating margin moderated QoQ. However, positive other income and improved tax rate, helped us to regain this impact at Net Profit level. We are confident that driven by execution of our key margin levers, we'll be able to recover our operating margins in coming quarters. Our Free Cash Flow generation continues to be strong and stands at 48% as a percentage of Operating profit. We are confident of continuous financial improvement driven by focus on cost structure optimization, increased efficiency from investments and optimization of financial metrics."

## BUSINESS UPDATE & OPERATIONAL HIGHLIGHTS

### Engineering (ENGG)

The Engineering operating unit had a very good first quarter with a growth of 4.6% QoQ which was diversified among all geographies. APAC posted double-digit growth followed by strong growth in US and EMEA, driven by Aerospace & Defense, Energy & Natural Resources, Medical and Semiconductor business segments. This quarter, the company secured a multimillion dollar contract from a new customer in the Semiconductor business segment in the APAC region. The company has been selected as one of the top 3 service providers for supporting an off-highway client in embedded software and electronics.

The company's Dallas Engineering Center has been cleared by its customer IT security team and is fully operational with infrastructure and software licenses. The company expects to see growth in this development center in FY15 and beyond.

The company is seeing positive traction in business for services such as value engineering, should cost, localization and product realization. From industries perspective, the company is expecting good growth coming from Transportation, Medical devices and Semiconductor.

### Data Transformation, Network and Operations (DNO)

Utilities business maintained the same pace as last quarter. The opportunity pipeline is encouraging and the company foresees an increase in the business in Q2 FY15 and beyond. The major growth is expected from Americas and EMEA regions in the coming quarters.

Communications business showed a growth of 2% QoQ. The company has seen momentum in the consulting and OSS business segments. The general outlook is favorable for Q2 FY15.

The Data Transformation group had a very strong last quarter. Company saw growth of 9% QoQ in its DT group and all industries have shown revenue improvement. The company also foresees similar growth in the coming quarters. While the company leverages on its existing client group, it is also focusing on new customers in this business.

Overall at the DNO level, the mix of work should not change drastically. The company should focus on maintaining onsite/offshore mix as there is a favorable outlook for onsite revenues. The company is also focusing on improvement of utilization. In the long term, the company is confident of achieving good improvement.

## OPERATIONAL HIGHLIGHTS
