

CYIENT

A close-up photograph of a network switch or patch panel. Several RJ45 ports are visible, each with a glowing green LED indicator light. Yellow Ethernet cables are plugged into the top two ports, and a white Ethernet cable is plugged into the bottom right port. The background is slightly blurred, showing more ports and screws on the metal surface. The text 'Control' and 'Streaming' is partially visible on the panel.

INNOVATIVE COMMUNICATIONS SOLUTIONS FOR THE NEXT-GENERATION CONVERGED NETWORKS

How we work with our clients to help overcome challenges
for a better tomorrow

Overview

Communications service providers (CSPs) face enormous challenges in today's markets. The introduction of high-speed data, voice, and new video services by cable companies, satellite carriers, and wireless broadband providers have created significant competitive pressure and increased the need for cutting-edge technology solutions.

It is imperative for the CSPs to be sure of their systems and data to match the ever-growing demands on fixed-net and wireless networks.

Cyient has an outstanding record of success in helping CSPs across the globe achieve their operational and business goals. Our services are structured around the widely recognized eTOM model. We support CSPs in end-to-end implementation of network infrastructure, operational support services (OSS), data transformation, and network optimization. Our services enable our clients to drive their products to market faster with reduced capital and operating expenditures.

Expertise

Technology-independent

Expertise across all leading inventory products including GE Smallworld, ESRI, Ericsson, Intergraph, Bentley, Amdocs Cramer, MetaSolv, ViryaNet, and Schneider Electric.

Vast Experience

Rich experience in partnering with leading telcos for implementation of a wide range of end-to-end consulting and implementation services.

Large Resource Pool

Experienced and certified telecom engineers with expertise in NGN and emerging technologies such as FTTx, ISDN, PDH, SDH, WDM, DWDM, DSL, GPON, Metro Ethernet, IPTV, MPLS, 2G, 3G, and 4G/LTE networks.

KEY HIGHLIGHTS

Providing FTTx planning, design, and deployment services to global communication operators

60+ million hours of experience in delivering FTTx projects worldwide

Experience of handling 500+ million network elements for data transformation

2,000+ dedicated telecom professionals supporting key tier-1 and tier-2 service providers worldwide

More than 33 tier-1 and tier-2 clients across the globe

Experienced field surveyors, designers, splicing specialists, and test engineers

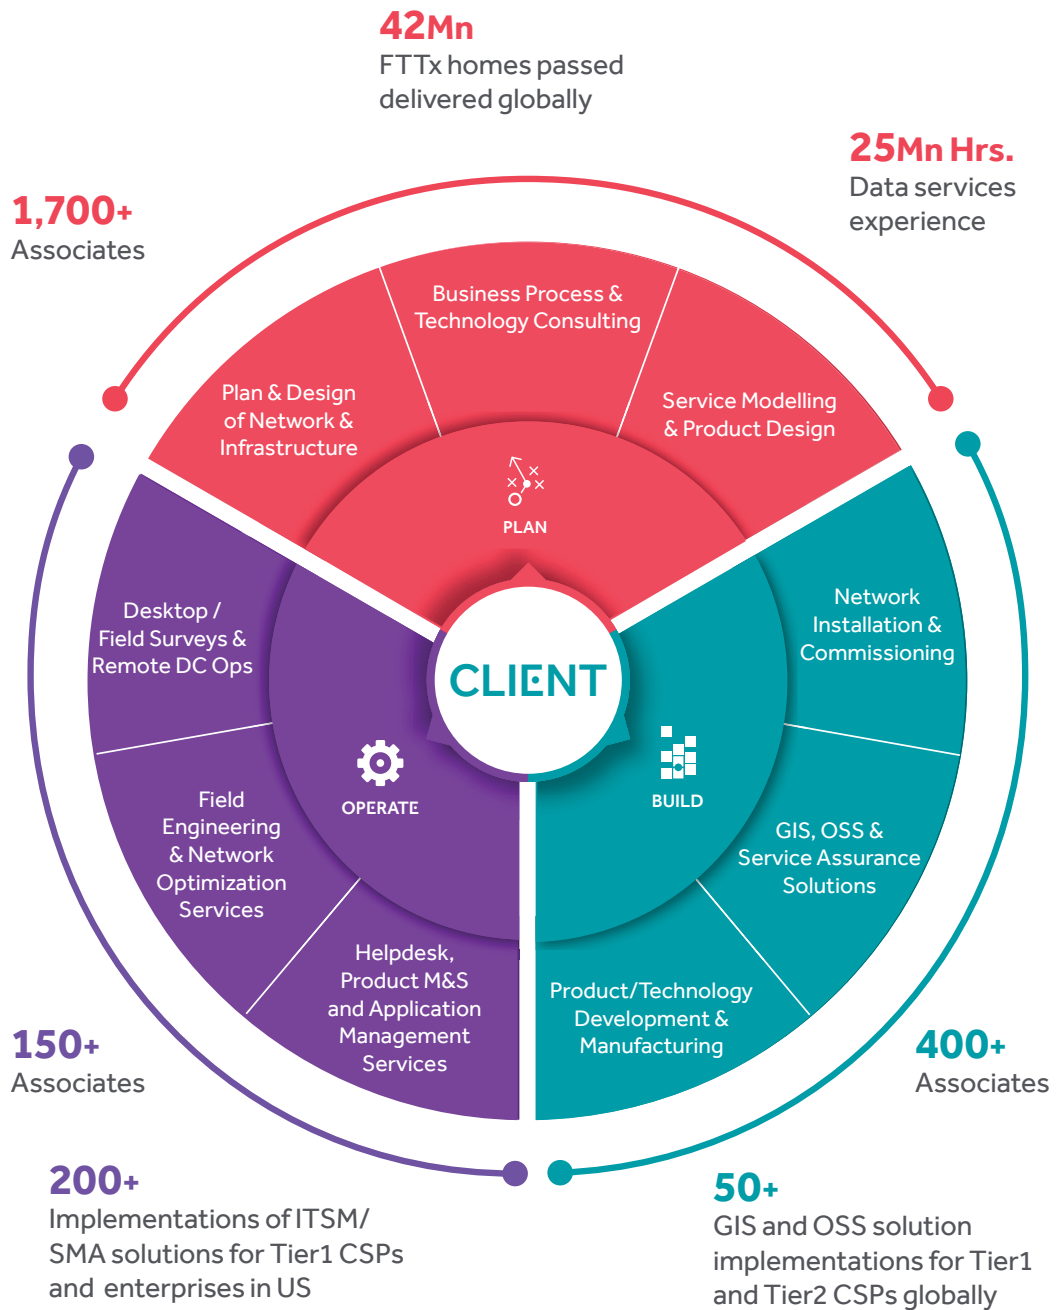

Award-winning implementation of end-to-end network inventory solutions and enterprise-wide integrations

Demonstrated record of delivering 700+ complex end-user applications/product customization for tier-1 and tier-2 CSPs

Consistent focus on process excellence resulting in 99% on-time delivery and first-time acceptance

Successful implementation of a unified network inventory system and field fiber engineering services for Asia's leading integrated telecom service provider

Cyient's Services and Solutions Are Aligned under the PBOF Framework

Value Proposition

- Enhance productivity—an array of tools developed in-house to automate manual processes while ensuring productivity improvements and high-quality deliverables
- Reduce cycle time and improve quality
- Demonstrated ability to quickly scale operations based on the business dynamics
- Industry certified (CFHP, CCNA, eTOM, ITIL, Prince2, and PMP) solution consultants, SMEs, engineers, and architects adept at supporting service providers in implementing best practices
- Proven processes and knowledge of existing and emerging technologies

About Cyient

Cyient (Estd: 1991, NSE: CYIENT) provides engineering, manufacturing, geospatial, network and operations management services to global industry leaders. We leverage the power of digital technology and advanced analytics capabilities, along with domain knowledge and technical expertise, to solve complex business problems. As a Design, Build and Maintain partner, we take solution ownership across the value chain to help our clients focus on their core, innovate, and stay ahead of the curve.

Relationships lie at the heart of how we work. With nearly 14,000 employees in 21 countries, we partner with clients to operate as part of their extended team, in ways that best suit their organization's culture and requirements. Our industry focus spans aerospace and defense, medical, telecommunications, rail transportation, semiconductor, utilities, industrial, energy and natural resources.
