

WESTERN *Reflections*

Severe Weather/Impact Doorglass

Western Reflections severe weather doorglass is designed for hurricane-rated doors. Each option is designed to provide protection from damaging wind, water infiltration, eliminate the need for hurricane shutters and suit your style and functional needs.

Our severe weather products meet the following requirements:

- Wind-borne debris regions or high velocity hurricane zones (HVHZ)
- Design Pressure (DP) $\pm$ 66 psf
- Wind and missile impact code requirements
- Texas Department of Insurance codes
- Florida Building Commission codes

Florida Wind-Borne Debris Region for Risk Category II Buildings

Texas First Tier Coastal Counties

Severe Weather/Impact Doorglass

Flat Frame Profile Offers Strength and Quality

- Flat profile for a wider range of architectural applications
- Low 3/8" profile
- Longer screws reduce potential strip out
- Flat screw hole covers install flush to frame
- White powder coat finish on aluminum frame can be painted
- No shop-related Dow 995 application required
- Meets Florida Severe Weather requirements ± 66 DP
- Product certification information available under FBC approval FL14935.1, FL14935.2, FL14935.3, FL14935.4

Impact-Resistance Laminated Glass

ODL Decorative Doorglass, Blinds, and Grilles are sealed between impact-resistant laminated glass on the exterior, and tempered safety glass on the interior.

Sound Transmission

Severe weather doorglass also reduces sound infiltration. Sound Transmission Class (STC) testing shows that laminated glass provides up to 30% more suppression of outside noise than standard doorglass, when used in a properly fitted and installed door system.

Missile Impact Testing

The Level D missile impact test involves firing an 8-foot long 2" x 4" at 50 feet-per-second at designated spots on the doorglass, and door slab. The entire door unit must remain intact through 9,000 pressure cycles, and also pass water infiltration, structural loading, and forced air-infiltration tests.

See the Missile Impact Test video at https://www.western-reflections.com/techinfo_impactstandards.htm

Gray Glass

Turtle Code Compliant

Thousands of marine turtles' nest in the U.S. coastal areas, and state and local ordinances protect hatchling turtles by limiting the brightness of inside-to-outside visible light transmittance. The severe weather Gray Turtle Glass meets these code requirements.
