

InsuredHQ launches two new product packages for microinsurance businesses

Wednesday, February 1, 2017

InsuredHQ has announced two new cloud offerings which are designed for those involved in managing or selling microinsurance business.

InsuredHQ Essentials is an automated comprehensive policy, client, accounting and claims management platform with full reporting capability. This is available on a monthly subscription rate, plus set-up fee. Implementation in countries with less reliable online services are available via an in-house server.

InsuredHQ Essentials can be combined with **InsuredHQ Retail**. This enables the sale of insurance online with automated quote, bind, payment and document emailing capabilities. InsuredHQ Retail allows for individual underwriting of microinsurance risks by any sales agent with an internet-capable device.
