

Do you trust your technology with devices and data?

As your business becomes more mobile and employees work across devices – including their own – your technology needs to keep up to avoid showstopping issues.

1 Mobility

63% of laptop use and **59%** of tablet use for business is done from home, on the go, or at another non-office location.¹

of employees said the “ability to work from any location at any time” improves productivity.²

also cited the “ability to access information quickly and easily”.³

+ 6.4 hours per week

Employees working at organisations strong in mobile enablement saw a **16%** boost in productivity – or 6.4 extra hours in a 40-hour week.⁴

What could your employees do with 6.4 more hours each week?

2 Connection and collaboration

of information workers believe better business tools will improve the location and sharing of information, and expertise to do their jobs.⁵

The average employee communicates and collaborates with more than 20 colleagues and customers daily.⁶

Are you providing the tools your workers need to do their best job at your business?

3 Security

of businesses surveyed had encountered at least one of a dozen common security issues.⁷

36%: Increase in ransomware attacks in 2016 with a **266%** increase in ransom demanded.⁸

\$9,485: Malware-infected mobile devices cost organisations an average of \$9,485 per device.⁹

Does every device in your network have the latest security update?

Is your business data safe if a device goes missing or is compromised through a phishing, malware or other attack?

Microsoft 365 Business is an integrated solution built to help growing businesses thrive, with productivity, management and security capabilities that empower employees, and easy-to-manage security that protects your company data.
