

CHOOSE YOUR OPTION FOR A BRIGHTER SMILE

Ready-to-go

Opalescence Go® prefilled disposable whitening trays comfortably adapt to your smile, allowing you to whiten anytime!

Available in Mint or Melon flavor, Opalescence Go whitening is more effective and easier to use than supermarket teeth whitening products. It offers you affordable, prescription-strength teeth whitening.

Customized

Opalescence® PF take-home whitening gel offers customized convenience. The gel is delivered via custom-made trays that are tailored to your smile. It is available in a variety of concentrations and three flavors (Mint, Melon, and Regular), with wear times ranging from 15 minutes to overnight, so you can select the option that best fits your needs.

Safe and effective, with sticky, viscous gel that won't migrate to your gums, Opalescence take-home whitening gel offers sustained whitening power in the comfort of your own home.

Aftercare

In addition to whitening treatments, Opalescence offers **aftercare** products. With Opalpix™ interproximal cleaners, Opalescence® Whitening Toothpaste, and a variety of toothbrushes, you'll keep your smile bright, white, and healthy long after whitening your teeth.

CHOOSE YOUR OPTION FOR A BRIGHTER SMILE

Ready-to-go

Opalescence Go® prefilled disposable whitening trays allow you to whiten anytime! The trays are made of a special material that comfortably adapts to your smile. Available in Mint or Melon flavor, Opalescence Go trays are an affordable, more effective alternative to over-the-counter whiteners.

Customized

Opalescence® PF whitening gel offers professional whitening power in the comfort of your own home. Your dentist will take impressions of your teeth and create whitening trays tailored to your smile. Opalescence PF whitening gel comes in a variety of concentrations for different wear times and is available in Mint, Melon, and Regular flavors.

Opalescence PF whitening gel comes in a variety of concentrations for different wear times and is available in Mint, Melon, and Regular flavors.

In-Office

Opalescence® Boost™ power whitening gel contains 40% hydrogen peroxide and offers brighter, whiter teeth after about an hour in the dental chair. Opalescence Boost whitening gel is chemically activated, so it starts working as soon as it is placed on your teeth and doesn't require a hot, uncomfortable light to work.

Administered and performed by a dental professional, Opalescence Boost gel is the ideal choice for in-office teeth whitening
