

TOP 10 BENEFITS OF A WINDOWS VIRTUAL DESKTOP

WHAT IS A WINDOWS VIRTUAL DESKTOP?

A Windows Virtual Desktop (WVD) is an Azure-based, internet hosted desktop service. Your desktop environment – including wallpaper, icons, toolbars, apps, widgets and customisations – are remotely stored online meaning you can access your desktop from any device, anywhere.

It's the only virtual desktop infrastructure (VDI) that delivers simplified management, multi-session Windows 10, optimisations for Office 365 ProPlus and support for Remote Desktop Services (RDS) environments. Deploy and scale your Windows desktops and apps on Azure in minutes and get built-in security and compliance features.¹

1

DEPLOY AND SCALE IN MINUTES

Quickly deploy desktop apps to the cloud, whether modern or legacy, with unified management in the Azure portal. Scale access up and down to suit peak-times, whether you need more during seasonal times or just less at the weekend – be totally flexible!

OPTIMISE COSTS

You only need to pay for your Azure Virtual Desktops, machines and Azure storage consumed by users as they use the service. Select and scale deployment options to match your organisation's needs.

2

3

SECURITY

With more compliance certifications than any other cloud provider, Microsoft have more than **3,500 security experts** dedicated to protecting your data. Windows Virtual Desktop with multi-factor authentication, allows users to securely access their work from anywhere.

TRUE FLEXIBLE WORKING

Phoenix specialise in helping organisations understand what collaboration means to them across a range of digital technologies and can help design, implement and manage the applications and platforms to improve collaboration. Windows Virtual Desktop only helps enable this!

4

5

SIMPLICITY WITH MANAGED SERVICES

If you're not an expert in scripting PowerShell, would like a helping hand through the process or would like your system set up for you – Phoenix are experts in managing Windows Virtual Desktop environments.

HAPPY END-USERS

Given true flexibility, your end-users will be loving the new system. With a seamless experience, loading their desktop on their tablets at home, a colleagues laptop when theirs is in for repair or on a 'workstation' in a crèche – the usability is seamless!
