

Hundreds of applications. Thousands of business processes. Millions of combinations. **ONE iPaaS.**

Celigo is the integration platform
that brings it all together.

**Integrate any
business application**
to any other business application

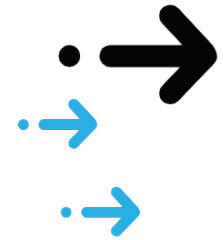

**Automate and optimize
business processes**
end to end

**Accelerate digital
transformation**
across the entire organization

Business processes need to be integrated

Celigo enables IT and non-IT teams to quickly **automate every business process** across the entire organization in the most optimal way.

Build integrations with the best-in-class business process automation workspace

Build custom integrations, mappings, and business logic to automate any unique business processes through a powerful and intuitive user interface.

Optimize processes using prebuilt integration applications with embedded business logic

Only Celigo delivers managed prebuilt integration applications that include embedded business logic to automate up to 100% of a business process.

Empower every team using one unified platform with infinite scalability

Enterprise iPaaS

with no limitations of number of integrations or data volume

Business self-service with IT governance

that is powerful and accessible with role-based control

Lowest total cost of ownership

that increases in value as you scale up

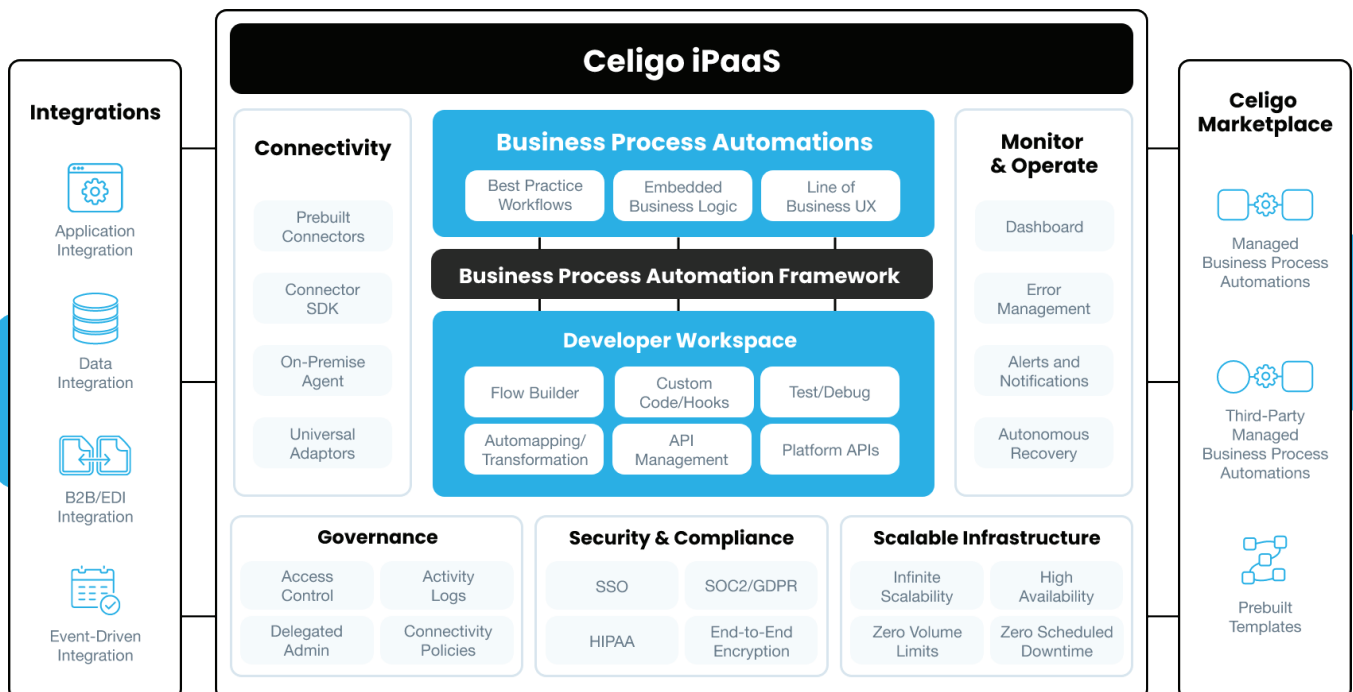

Automate every use case across the organization

- Lead to Prospect
- Quote to Cash
- Customer 360°
- IT Management
- Data Warehousing and Analytics
- Hire to Retire
- Procure to Pay
- Expense Reporting
- Employee Onboarding
- Accounts Payable

Plus **thousands** more.

The Celigo Integration Platform

Loved by customers. Recommended by the experts.

Celigo named **G2 Best Software for 2023**

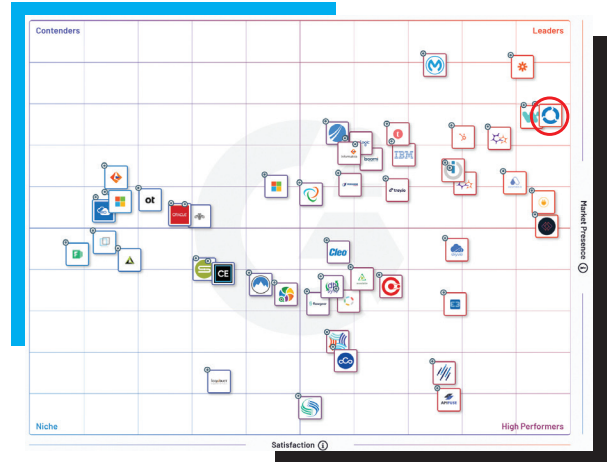

4.9 ★★★★★

Gartner

5.0 ★★★★★

G2 Leader in iPaaS

"Celigo gives you the ability to manage the exceptions, not the minutia. You see what's wrong, take five minutes to fix it, and away you go. Without Celigo, we'd probably have 10 or 15 more people doing all this work with us. Now, we're truly running a business, instead of a business running us."

"The automation of our staffing processes took away manual work and dramatically changed our labor models. Not only did we save a ton of effort, but we got data integrity, and we no longer have all the errors which affect people's payroll and pay rates."
