NetSuite - Magento 2
## Integration App

celigo

ORACLE NETSUITE

Magento
An Adobe Company

Prebuilt integration to automate transfer of orders, fulfillments, inventory levels, and more between NetSuite and Magento
Comprehensive flows out-of-the-box
Automate order-to-cash across sales, orders management, fulfillment and much more

Intuitive setup without coding
Intuitive design that guides you through the process of setting up the integrations, without worrying about APIs or code
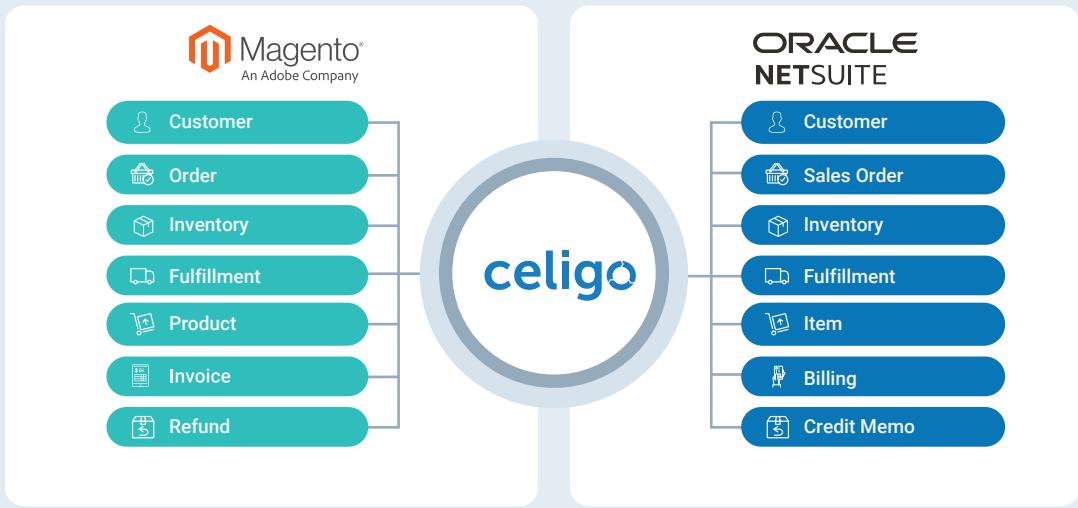

Self-service with low maintenance
Built for both IT and end-users, take control of your integrations with the Celigo standalone application

Customizable and expandable
Data integration flows can be customized and expanded with Celigo's iPaaS, without requiring technical resources

- Order
- Inventory
- Fulfillment
- Product
- Invoice
- Refund

celigo

ORACLE NETSUITE

- Customer
- Sales Order
- Inventory
- Fulfillment
- Item
- Billing
- Credit Memo

What is an Integration App?

Many other vendors offer recipes and accelerators that help connect different applications. However, **only Celigo offers Integration Apps.**

Integration Apps are complete, standalone SaaS applications that connect two applications. They are built on an iPaaS, which allows for a level of robustness and customization not possible with direct connections.

" Our integration with the Celigo Magento 2 Integration App was a seamless and headache free process.
Christopher Donnelly — Director of Digital and Ecommerce, Buscemi LLC "

celigo

Built for
ORACLE NETSUITE
Integrated SuiteApp

Omnichannel Ecommerce
Automatically synchronize orders from all channels, including marketplaces, pos, social, and phone orders, from Magento to NetSuite to make sure orders are fulfilled at a rapid pace

Products
Sync Products, Images, Categories, Attributes and Pricing with support for all the key NetSuite Item types (Inventory, Matrix, Kits and more). If Magento Product Variations are setup as   Inventory Items (non-matrix) in NetSuite, the advanced Virtual Variations feature keeps them in sync

Inventory Levels
Update inventory levels from either single or multiple warehouse locations with support for all the key NetSuite Item types (Inventory, Matrix, Kits and more)

Payment Capture
Configure payments to be captured in Magento at time of sale, in NetSuite after fulfillment, and/or in Magento after fulfillment in NetSuite

Sales Tax Handling
Use NetSuite (SuiteTax) or sales tax engine setup in Magento to calculate and report sales taxes on the NetSuite Sales Orders

Promotions and Gift Cards
Post Magento cart and line-level discounts to NetSuite coupon codes/ promotions/ individual line items. Magento gift cards that are redeemed can be tracked as a line item in the NetSuite Sales Order

Cancellations and Refunds
Sync Products, Images and Attributes from NetSuite with support for all NetSuite Item types. If Magento Product Variations are setup as Inventory Items (non-matrix) in NetSuite, the advanced Virtual Variations feature keeps them in sync

Cancellations and Refunds (Premium)
Sync order cancellations and refunds from NetSuite to Magento to keep Customer Service, Finance and customers up-to-date

Multiple Magento 2 Stores
Prebuilt support for connecting multiple Magento websites/stores/store views to a single NetSuite account

Built on a Modern iPaaS Platform
Fast, Scalable, Flexible

Celigo Integration Apps are built on Integrator.io, the complete and intuitive iPaaS that allows you to quickly connect NetSuite with most apps.
