Complete Integrations for Connected E-commerce

Prevent lost orders and fulfill all your orders—across all channels—accurately and timely by integrating NetSuite with all applications and vendors that are part of your e-commerce business. Retailers, Manufacturers, Distributors, and Wholesalers using NetSuite rely on Celigo to connect their e-commerce businesses.

Connected E-commerce with Celigo

STOREFRONTS

MARKETPLACE

POS

LOGISTICS

And many more...

E-commerce Integration Apps

Prebuilt, Managed, Advanced Integration Applications

Celigo Integration Apps are best-in-class prebuilt integrations between NetSuite and popular applications. Built on the integrator.io platform, Integration Apps are fully managed, out-of-the-box integrations with support for these e-commerce applications and more:

Online Storefront

Online Marketplace

Prebuilt FAST TIME-TO-VALUE

- Self-guided wizard to install prebuilt, out-of-the-box integration
- Intuitive basic and advanced configuration options
- Productized NetSuite and e-commerce integration best practices

Managed REDUCED MAINTENANCE

- Continuous enhancement upgrades
- Automatic support of endpoint updates
- Support and implementation services from Celigo

Advanced PREMIUM INTEGRATION APPLICATION

In addition to synchronizing key data (e.g., Orders, Products, Customers, Shipping, etc.), access advanced capabilities including:

- Support for multiple storefronts and marketplace accounts
- Preventing duplicate order and customer records
- Special features (e.g., Shopify risk metrics, Amazon settlement, eBay Business Policies, etc.)
- Full visibility to self-monitor, troubleshoot, and update integrations

integrator.io iPaaS Platform

Next-Generation Integration for E-commerce

Celigo's integrator.io makes cloud integrations fast and easy for anyone—whether you are an e-commerce manager, application admin, or IT developer. Use step-by-step wizard, integration templates, and API assistants in integrator.io to quickly connect NetSuite to your e-commerce systems, such as:

- Online and Offline Channels
- Payment Systems
- Warehouses, Distribution Centers
- Amazon FBA, 3PL, Shipping Providers
- Returns and Exchanges

Integration Templates and Assistants

In addition to best-in-class Integration Apps, Celigo also provides integration templates and assistants to accelerate the integration processes. These are pre-packaged integration flows that can be installed, configured, modified, duplicated, or deleted. Also, API wizards guide users through parameters of common applications.

Implementation and Customer Success

Whether you want to do your own integrations, or have someone take care of it for you, Celigo offers multiple tiers of expert implementation and customer success plans.

Enabled

For customers who want to implement themselves, with value-add expertise from people who have done the integration many times before.

Advisory

Upfront assistance and independence to finish on your own integrations for customers who want detailed assistance at the start.

Managed

For customers who want the most guidance, Celigo co-leads the implementation with you from start to finish.

About Celigo

As companies increasingly rely on more cloud applications to run their businesses, the need for easy-to-deploy integration platforms and solutions to connect these cloud apps has never been greater. Businesses cannot succeed unless fragmented processes and siloed applications are connected.

Integration should not be hard. Our mission is to enable applications to work together as one, in a way that is easy and simple.

“

Since introducing the Connector, we have saved time and money on manual transfer of Amazon sales data and eliminated order entry errors.

— Gary Hill MARKETING DIRECTOR, HEARING DIRECT

”

Celigo integrator.io allowed us to gain full control over integration so that we can easily update, change, or troubleshoot without depending on external resources.

— Jonathan Bell DIRECTOR E-COMMERCE, AFLORAL

“

Easy to configure and easy to manage solution for interfacing with our 3PL. Once it's up and running, there's very little to do. Very reliable and low-maintenance solution.

— JEFF LEBLANC CO-FOUNDER, OUT OF PRINT
