

## Marketplace Integration Apps for NetSuite

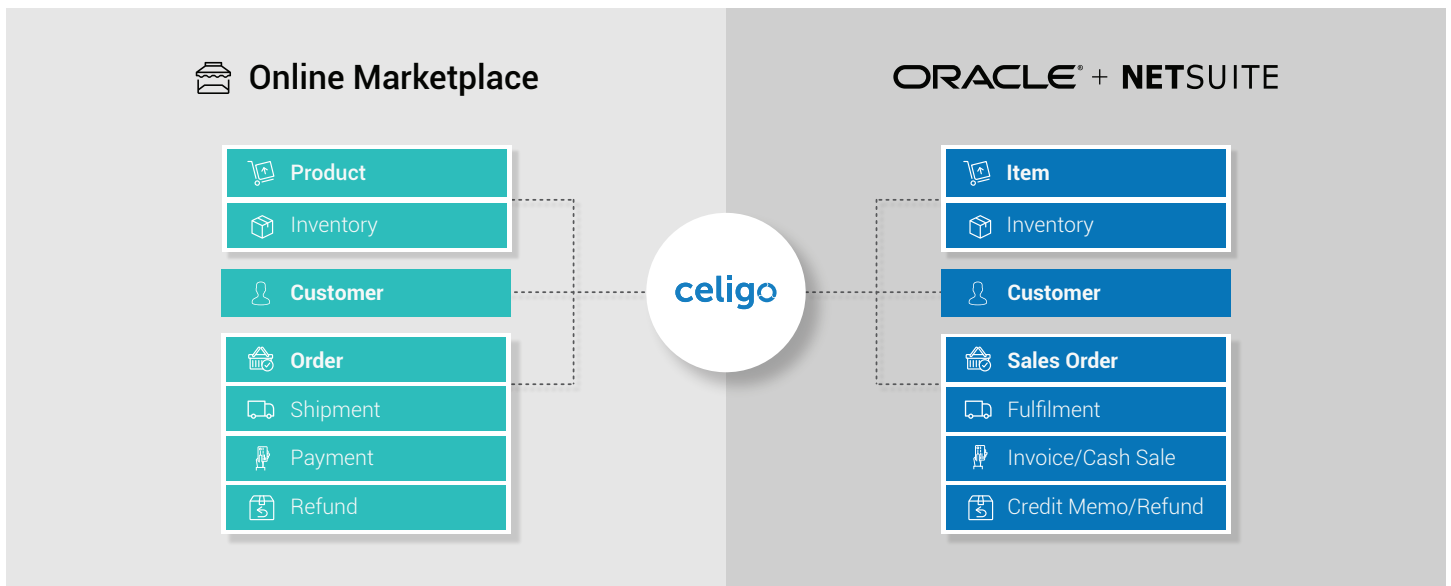

Streamline multichannel sales with prebuilt integrations for NetSuite ERP

Many online retailers sell in one or more online marketplaces. To be successful in these marketplaces, companies must deliver optimal buying experience for shoppers. Order delays, inaccurate product information, or lack of real-time order status can result in unfavorable reviews – leading to lost sales and poor online reputation.

A key driver for optimizing the buying experience is ensuring that back-office operations are streamlined. This requires data to seamlessly flow between back-office systems, such as NetSuite ERP, and online marketplaces.

Celigo Marketplace Integration Apps provide out-of-the-box solutions that automate data exchanges between NetSuite and popular marketplace platforms. These prebuilt integrations help streamline ordering and fulfillment processes and can easily handle seasonal or unexpected volume spikes – enabling companies to successfully sell on marketplaces.
