## SAP Ariba Network - NetSuite Quickstart Bundle for Buyers

SAP Ariba 

ORACLE  
NETSUITE

Enable fully digital supplier collaboration capabilities by  
integrating the SAP Ariba Network with NetSuite

### Order Management

Add/update purchase orders in SAP Ariba Network and receive order confirmations in NetSuite

### Ship Notices

Grab ship notices from SAP Ariba Network, update shipment status in NetSuite, and send item receipts without any manual input

### Invoices

Receive SAP Ariba Network invoices in NetSuite as vendor bills and keep status updates synced

### Payments

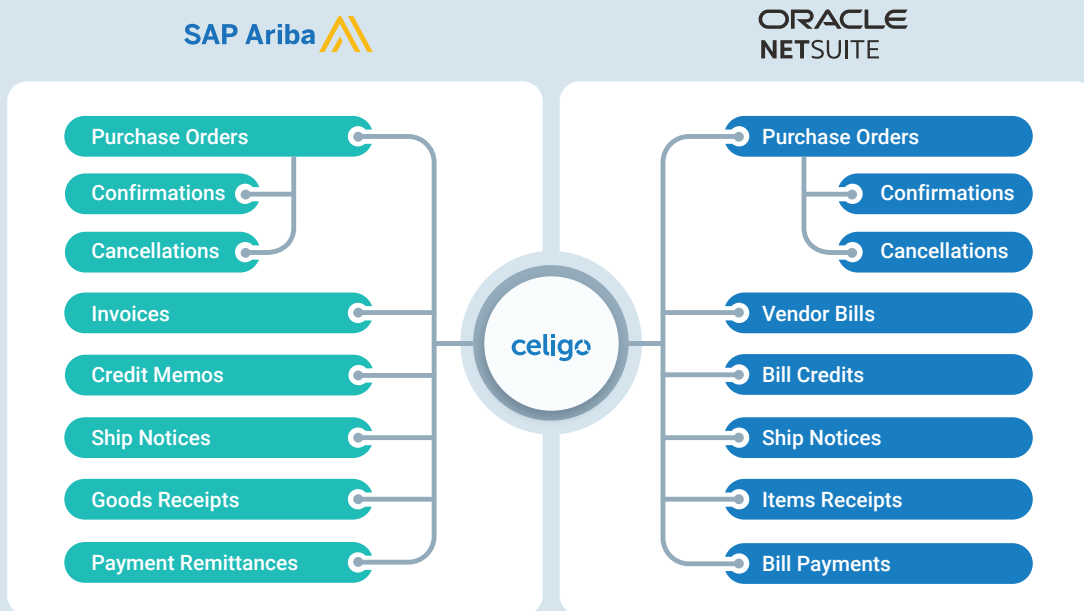

Automatically record NetSuite bill payments as payment remittances in SAP Ariba Network

## Key Benefits

- ✓ **Ensure payment compliance** with quicker invoice processing and data accuracy, minimize wrong or duplicate payments, and improve accounting processes with overall financial visibility
- ✓ **Optimize procurement and supplier operations** by automatically updating orders and invoices in real-time
- ✓ **Efficiently scale operations** by automating processes that rely on the SAP Ariba and NetSuite platforms
- ✓ **Gain total visibility** into the supply chain by automating the procurement process with real-time, ongoing, two-way supplier communication
- ✓ **Reduce maintenance** time with an interactive dashboard for sophisticated error handling and integration support
- ✓ **Take control of your integrations** with tools that let you configure and make mapping changes on the fly

# A fully featured integration for SAP Ariba Network - NetSuite

Integrate SAP Ariba Network with NetSuite to automate purchases and provide real-time visibility into invoicing and statuses. Celigo's Quickstart Bundle contains pre-built workflows that can easily be configured and deployed without coding or IT support.
