“We have implemented a number of Celigo's products into our business with great success, and the eBay Connector was no different. The solution allows us to efficiently integrate our eBay business with NetSuite, making the flow of orders and product data seamless. The more streamlined process creates a better experience for our customers and is less of a burden on our staff. I highly recommend that any e-commerce business operating on the NetSuite platform should take a serious look at Celigo's suite of connectors.”
