

## Nodify™ Blood-Based Lung Nodule Testing

# Confidence in the Path Forward

### WHAT IS THE TEST FOR?

Nodify blood-based testing helps your doctor know the best next steps for managing the nodule in your lung.

### HOW DOES THE TEST WORK?

While the majority of small lung nodules found are not cancerous, your doctor will use Nodify blood-based testing to help assess your risk of having lung cancer.

### IS NODIFY TESTING RIGHT FOR ME?

Using specific questions about your health history and images of the lung nodule, your doctor will assess whether Nodify testing is right for you.

Biodesix® is committed to making our blood-based tests available to all patients.

## FOR PATIENTS WITH MEDICARE

Biodesix bills Medicare directly and accepts Medicare payment as payment in full. There is no out-of-pocket expense for covered Medicare patients.

## FOR PATIENTS WITH MEDICAID

There is no out-of-pocket expense.

## FOR PATIENTS WITH PRIVATE INSURANCE

Biodesix will work with your insurance company directly by filing your claim.

## DEDICATED CUSTOMER CARE

Our Colorado-based billing team will file all claims and prepare any necessary appeals on your behalf with your insurance company.

## BIODESIX ASSIST™ FINANCIAL SUPPORT PROGRAM

Biodesix understands the financial stresses that health issues can place on you and your family. We have created a financial assistance program for you to assist in providing affordable care.

To learn more information about the Biodesix Assist Financial Support Application process, please call our Patient Care team at 1.866.432.5930.
