

Tripod Turnstiles

Softworks Tripod Turnstile Series are high performance, multi-purpose turnstiles, perfectly compact and cost-effective pedestrian access control solutions, enabling controlled and secure access of people to areas defined by the operators.

For indoor and outdoor solutions (under shelter), for modular individual and multiple installations, the turnstiles are ideal passageways without the need for extra guide barriers. The high throughput capacity of these turnstiles makes them suitable for management of heavy pedestrian traffic.

For emergency they are equipped with electro-mechanical drop arm, opening an anti-panic passageway in a matter of seconds. Optionally, the turnstile's housing can be finished in steel 316, for outdoor solutions (without add-on protection). Our unique internal turnstile mechanisms offer superior durability at minimum energy consumption. In fact, our turnstiles are tested to well over two million operations -- equivalent to many years of continuous, real-world usage.

- Easy to install, simple to use
- Distinct zinc alloy decorative trims, with a brushed stainless steel surface
- Intuitive LED prompt for passenger direction
- Semi-automatic arms automatically drop when power off, manually rise up when power on
- Full alloy steel spindle patented with shape adaptation feature against strong impact to ensure normal functionality even with moderate deformation
- Unique anti-overheating mechanisms ensure smooth flow of high traffic
- Rotating tripod arms made of stainless steel tubes of 38mm diameter
- Anti-tailgate function
- The system supports people counting and can display the number by optional LED
- The system allows maximum crowd capacity control through software settings

Tripod Turnstile Models

Model description:

SW-TS00: Tripod turnstile only

SW-TS11: Tripod turnstile integrated with RFID reader and controller

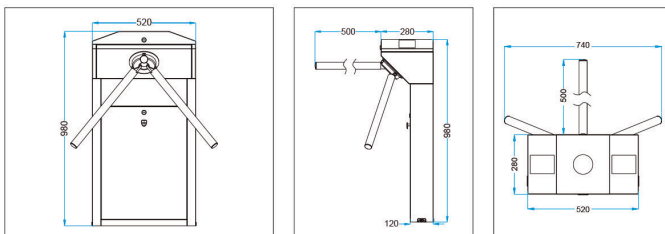

SW-TS22: Tripod turnstile integrated with both fingerprint and RFID reader and controller

SW-TS33: Tripod turnstile integrated with Multi-biometric terminals

Third Party hardware integration:

Softworks turnstiles are available as one complete access solution, but we also offer just the simplified turnstile main frame (SW-TS00), adaptable to third party access control systems, avoiding unnecessary costs for installers in having to modify their current Access Control systems.

SW-TS1000	SW-TS1011	SW-TS1022
Tripod Turnstile	RFID	FP+RFID

SW-TS1200	SW-TS1211	SW-TS1222
Tripod Turnstile	RFID	FP+RFID
