

# Product Lens

a materials health assessment

## COMPANY AND PRODUCT INFO

<b>Issued to</b>	<b>Mohawk</b>
<b>For the Products</b>	VersaLAN®, Category 6 & 5e Communications Low Smoke Rated Cable OSP, UTP, 4 Pair, Gel-filled, CM-LS
<b>Description</b>	Part Number: M58762, M58772
<b>Certification Period</b>	January 2017- January 2019
<b>Assessor</b>	<b>MBDC</b> basis methodology v3.1*

## Qualifications

- LEED BPDO Credit: Material Ingredients Option 1  Qualifies for as 1 product
- LEED BPDO Credit: Material Ingredients Option 2  Qualifies for 100% of cost

## Other Achievements

## MATERIALS / INGREDIENTS INFORMATION

Disclosure Level: 100 ppm  1000 ppm

The following table represents the top 97% of the material ingredient disclosure and ratings. For the full ingredient disclosure information, please see the table on the reverse side.

Materials	Result			
	Supply Chain/ MFG	Install	Use	End of Use
Copper	Yellow	Green	Green	Yellow
Proprietary	Yellow	Green	Green	Green
Proprietary	Yellow	Green	Green	Green
Polyolefin 1	Green	Green	Green	Green
Proprietary	Green	Green	Green	Green
Proprietary	Green	Green	Green	Green
Proprietary	Black	Green	Green	Green
Proprietary	Yellow	Green	Green	Green
Proprietary	Green	Green	Green	Green

### Exposure Indicator

D = Dermal, Skin
I = Inhalation, air
O = Oral, mouth

\*No Indicator means no potential exposure scenario identified

### Color Ratings

Green	Low or mild hazard identified and/or potential exposure
Yellow	Moderate hazard identified and/or potential exposure
Red	Problematic concern found. The combination of the hazard and potential exposure leads to some caution for some uses and/or applications.
Grey	Cannot be fully assessed due to either lack of complete formulation, or lack of toxicological information for one or more ingredients.
Black	Highly problematic material containing one or more chemicals classified as CMR and having a plausible route of exposure.

# Product Lens

*a materials health assessment*

Material	CAS Number	Role	%					Comment
				MFG	Install	Use	End of Use	
Copper	7440-50-8	Conductor	32-38					Highly toxic to aquatic organisms; however, this material is acceptable for use in all phases due to limited exposure opportunity to biosphere.
Proprietary	Proprietary	Jacket	27-30					Some chronic toxicity concerns, but little risk as used in this product.
Proprietary	Proprietary	Jacket	11-12					Acceptable for use across all product phases.
Polyolefin 1	Proprietary	Insulation	8-9					Little to no risk across all product phases
Proprietary	Proprietary	Filling compound	5-6.5					Little to no risk across all product phases
Proprietary	Proprietary	Filling compound	1.2-2.0					Little to no risk across all product phases
Proprietary	Proprietary	Jacket	1.0-1.4					CMR - reproductive toxin.
Proprietary	Proprietary	Jacket	1.0-1.4					Acceptable for use across all product phases.
Proprietary	Proprietary	Jacket	1.0-1.4					Little to no risk across all product phases
Proprietary	Proprietary	Filling compound	0.4-0.8					Acceptable for use across all product phases.
Polyolefin 2	Proprietary	Various components	0.4-0.8					Little to no risk across all product phases
Proprietary	Proprietary	Jacket	0.4-0.8					Little to no risk across all product phases
Proprietary	Proprietary	Jacket	0.4-0.8					Little to no risk across all product phases
Proprietary	Proprietary	Jacket	0.4-0.8					Little to no risk across all product phases
Proprietary	Proprietary	Filling compound	0.08-0.4					Acceptable for use across all product phases.
Proprietary	Proprietary	Jacket	0.2-0.4					Little to no risk across all product phases
Proprietary	Proprietary	Jacket	0.2-0.4					Little to no risk across all product phases
Proprietary	Proprietary	Insulation	<0.1					Little to no risk across all product phases
Proprietary	Proprietary	Insulation	<0.1					Little to no risk across all product phases
Proprietary	Proprietary	Insulation	<0.1					Little to no risk across all product phases
Titanium Dioxide	13463-67-7	Various components	<0.1					Little to no risk across all product phases

	Low or mild hazard identified and/or potential exposure
	Moderate hazard identified and/or potential exposure
	Problematic concern found. The combination of the hazard and potential exposure leads to some caution for some uses and/or applications.
	Cannot be fully assessed due to either lack of complete formulation, or lack of toxicological information for one or more ingredients.
	Highly problematic material containing one or more chemicals classified as CMR and having a plausible route of exposure.
