

# School Safety and Security Are you prepared?

Your phone system is a lifeline for students, teachers and staff.  
**Is your school's phone system capable of meeting the challenge?**

## 4 Ways to Achieve Higher Levels of School Safety and Security

In an emergency, a phone system is a lifeline for teachers, students, parents and staff. To increase speed and responsiveness, advanced education phone technology offers:

### 1. Real-time alerts

Built-in alert system that generates audible desktop alerts & phone calls to all connected users

### 2. Multi-level notifications

A variety of alert types and codes to ensure appropriate emergency response

### 3. Detailed activity log

Time-stamped event log for training, legal reference, PR and policy management

### 4. E 911 Capabilities

Instantly identifies the exact location within the school where the call was initiated to emergency responders
