Notice on the MRJ's flight today

Mitsubishi Aircraft Corporation
Mitsubishi Heavy Industries, Ltd.

Nagoya, August 28, 2016 –

The MRJ (Mitsubishi Regional Jet) has started the ferry flight to the United States today, however we came to recognize that the monitoring function of the air management system needs to be inspected during the flight as yesterday. We then decided to return the aircraft to Nagoya Airfield.

We will decide the date to resume the ferry flight based on the results of inspection.
