## Notice on coverage of the MRJ today

Mitsubishi Aircraft Corporation  
Mitsubishi Heavy Industries, Ltd.

---

### **Nagoya, August 27, 2016 –**

The MRJ (Mitsubishi Regional Jet) was scheduled to start the ferry flight to the United States today, after confirming the system functionality in the test airspace.

We came to recognize that the air management system needs to be inspected during the flight. We then decided to return the aircraft to Nagoya Airfield.

We will decide the date to resume the ferry flight based on the results of inspection.
