

MRJ's Latest Development Status

Mitsubishi Heavy Industries,
Ltd.
Mitsubishi Aircraft Corporation

Tokyo, January 23, 2017 –

Mitsubishi Heavy Industries, Ltd. (MHI) announced today that MHI and Mitsubishi Aircraft Corporation will adjust the first delivery of the Mitsubishi Regional Jet (MRJ) from mid-2018 to mid-2020. The change is due to revisions of certain systems and electrical configurations on the aircraft to meet the latest requirements for certification.

MHI recently established the MRJ Business Promotion Committee, chaired by Shunichi Miyanaga, President & Chief Executive Officer of MHI, to oversee the continued development and long-term business performance of the MRJ, effective on November 28, 2016.

Since the historic MRJ first flight in November 2015, we have made significant progress in both engineering and test, and now three aircraft are in flight test in the United States.

Going forward, under the MRJ Business Promotion Committee's oversight, we will continue to make prompt decisions and remain firmly committed to the development of the MRJ to offer our customers an aircraft with world-class performance and compatibility with latest industry certifications.
