

## VICTOR 1280-7 with *Wireless Data Relay*:

A revolutionary innovation to pair your personal computer and your printing calculator.  
*Perfect for Tax Professionals & Serious Number-Crunchers.*

**BOLINGBROOK, IL. (December 10, 2010)** – Victor Technology LLC has announced the launch of the next generation Victor 1280-7. The 1280-7 features a revolutionary innovation for printing calculators; it connects wirelessly to a computer using the new *Wireless Data Relay* feature.

*Wireless Data Relay* is a productivity-enhancing feature that allows the calculator to send figures directly to spreadsheets, word processors, tax programs and other computer or web-based software. Forget about those unruly and expensive paper rolls; *Wireless Data Relay* offers the first ever paperless Print-to-PC printing for easy data recovery and storage.

"It's easy to use the new 1280-7," says John Ringlein, Chief Operating Officer at Victor Technology, "all you have to do is plug the USB drive into one of the USB ports on your computer. There is no software to install, just plug it in and it's ready to go."

Victor's exclusive *Wireless Data Relay* offers three exciting new ways to use a printing calculator.

1. *Send-to-PC* key allows the user to send any result displayed on the calculator directly to the computer. The result appears at the location of the computer's cursor. "This feature is especially useful for the tax professional that needs to add up several numbers, but only needs the total entered into the tax software," Ringlein explains.
2. *Paperless Printing* offers the user the opportunity to create a digital tape record on an excel spreadsheet, reducing the need for paper rolls and enabling electronic storage of your calculator work. "Print-to-PC mode is a great feature," Ringlein expounds, "if you are a person who needs to keep your work, it is an actual paperless record."
3. *Wireless Keypad* mode. In this mode, the calculator serves as a keypad for the computer and the calculator functions are disabled. "This notable feature is perfect for professionals who prefer to enter data with a ten-key's full-size keyboard. It helps a person minimize errors and increase productivity," Ringlein advises.

The 1280-7 with *Wireless Data Relay* is manufactured with 45% recycled plastic, making it an eco-friendly choice for your office.

"If you're looking for a full-featured printing calculator that wirelessly sends information to your computer and has all the functionality of a premium printing calculator, the Victor 1280-7 is for you," says Jessi Papke, Marketing Team Leader at Victor Technology.

Victor calculators are available through independent office supply dealers throughout the United States, Canada, and Puerto Rico. To find a dealer near you, contact Victor at 1-800-628-2420, go to [www.victortech.com](http://www.victortech.com) or enter "Victor Printing Calculator" in an internet search engine.
