PHYSICAL SECURITY

Safeguard Your Business, Protect People and Property

It's impossible to put a price on safety or measure the cost for having peace of mind. Almost everyday, the news includes stories about damage or loss due to security gaps or lack of safety protocols. Don't worry or stress about what might happen, let ComSource security experts help protect your organization.

ComSource Security Solutions

Physical security is often overlooked due to the overwhelming focus on information and data security in today's technological age. But there are very different risks that exist and potential weaknesses to be exploited, both requiring special countermeasures to truly ensure security physically.

We can help you design proper security procedures as part of a full-scale plan, and put the correct security systems in place to preserve the welfare of the most valuable assets in your organization by:

- Protecting people from injury or violent threat.
- Protecting equipment and systems from malicious access, tampering or theft.
- Protecting facilities from unauthorized entry.

70% of all businesses experienced a security incident in 2017, according to the Kroll Annual Global Fraud & Risk Report.

NPR reported that schools in the U.S. now receive an average of **50 threats** of violence every day.

The ComSource Difference

We serve clients with the utmost dedication by cutting through the noise to find products and design solutions that empower your business. Our vendor certified staff has a passion for technology, and adds such significant value that our customers stay with us for decades, and take us with them when they change roles.

About ComSource

- Headquartered in Upstate New York.
- Hundreds of satisfied customers in all 50 states.
- Best-in-class customer service, leading edge technology backed by vendor certification.

PHYSICAL SECURITY

SECURITY ACCESS OFFERINGS

Use your network as a strategic asset which unifies your workforce so it fosters teamwork, growth and synergy.

Access Control Systems

ComSource security experts know and implement the most innovative access and identity management solutions, including multi-factor and biometric authentication, so you always know who is in your building, and has entry to secure areas.

Credentialing and Badging

Ensure everyone is authenticated at all times. Leverage our expertise with systems issuing access credentials that have the ability to dynamically change based on roles and policies, which are fully integrated with your access control solution.

Visitor Management

Don't register visitors with a handwritten paper log that is easy to scam, without providing any true security. We can help you choose and deploy an automated visitor management system that meets compliance regulations and supports auditing of visitor data.

SECURITY NOTIFICATION OFFERINGS

Monitor activities, with the ability to quickly send mass alerts and promote safety in the case of an event.

Video Surveillance

Effective video surveillance systems serve as an effective deterrent, which also capture and document security events. We design, install and maintain surveillance systems and video storage, so you have the right capture technology for your camera footage. Our solutions will keep an eye on your facility so you can focus on running your business.

Emergency Notifications

When an event occurs, seconds can matter the most. We are savvy in a variety of multi-channel mass notification solutions that integrate into your existing infrastructure, so you can quickly get the message out to the right people, no matter where they are and no matter what device they are using.
