MEDICAL SPANISH SYLLABUS

Developed with
Innovation Award research

OVERVIEW

CanopyLearn is the **#1 medical Spanish course in the US** designed for healthcare professionals. The engaging and bite-sized modules are crafted specifically for clinicians and staff and employ a proven learning-by-speaking methodology.

Our learn-by-speaking approach puts you in the active role of producing and applying new skills through a variety of activities like:

- ✓ Flashcards
- ✓ Interactive practice
- ✓ Patient-provider role-play exercises
- ✓ A real telenovela series
- ✓ And more!

The medical Spanish curriculum includes approximately **45 hours** of content across all three levels, with grammar, pronunciation, and vocabulary for **36 medical specialties** including:

- ✓ Basic physical exams
- ✓ Diabetes
- ✓ Injuries & medication
- ✓ Cardiology, Urology, and much more!

Each level takes an average of **12-15 hours** to complete. Ultimately you determine your pace on your own schedule, there is no right or wrong pace. Users receive a certificate of completion for each level completed, and can also claim **15 CE/CNE/CME** credits for each completed level, or up to **45** credits for completing all 3 levels!
