NOTIFICATION

| | |
|--|--|
| Equip. Manufacturer: Head Rush Technologies | Affected Production Dates: All FlightLine Free Fall Devices |
| Equip. Name: FlightLine Free Fall Device | Affected Serial No: All FlightLine Free Fall Devices |
| Model Number: <i>FlightLine Free Fall Device Installation and Operation Manual</i> P/N 10952-06 | |

Abstract of Issue:

FlightLine Free Fall Device Manual P/N 04070095205 (revision 5) has been updated and released as P/N 10952-06 (revision 6). The FlightLine is now referred to as a “Free Fall Device” instead of a “Free Fall Ride”.

Reason for Release:

The FlightLine is a device designed to be used as a component within a free fall ride. A free fall ride consists of other components, platform, carabiners, harnesses, etc. Head Rush Technologies has updated the *FlightLine Free Fall Device Installation and Operation Manual* to identify the product as a Free Fall Device instead of a Free Fall Ride.

Action To Be Taken: Review *FlightLine Free Fall Device Installation and Operation Manual* (P/N 10952-06)

Detail of Modification:

The FlightLine Free Fall Device was referred to as a Free Fall Ride in preceding manual revisions (Rev 1 – Rev 5). In Rev 6 (P/N 10952-06) of the *FlightLine Free Fall Device Installation and Operation Manual*, the FlightLine is referred to as a Free Fall Device. The name has been updated to reflect that the FlightLine Free Fall Device is a component within a free fall ride.
