

Hose Reel L 1815 9ch Swivel

372924

The Hose Reel Swivel LHR L 1815 9 channel Swivel together with the Lamor 80 m (262 ft) hose package is an effective unit for hose handling of medium, large and offshore skimmers on vessels or barges. With the integrated swivel, the skimmer can be powered by hydraulics in use during deployment and retrieval without having all the hoses deployed from the reel.

The reel frame is manufactured from high quality marine grade coated steel. The spool is made of marine grade aluminum and has an integrated nine hydraulic channel stainless steel rotary swivel. The spool is rotated with a high torque hydraulic motor gear package. The reel can be lifted securely from the fork lift channels or from the dedicated lifting points located on the frame. The reel is designed to fit inside a container and can be locked and secured by either the dedicated lashing points or the built in ISO container corners. The reel can be fitted with rotation control valve on the reel (optional, not included)

The hose package consists of nine hydraulic lines and discharge hoses that are wrapped in a PVC covered hose float. The hose float can easily be opened and closed for maintenance.

Technical Specifications:

Length	2020 mm	80 in
Width	1840 mm	72 in
Height	2035 mm	80 in
Weight	650 kg*	1433 lbs*
Weight with 80 m hose	1680 kg **	3703 lbs**
Spool width	1500 mm	59 in
Hose length	80 m (5 in)	262 ft (5 in)
Hydraulic flow	15 l/min	4 gpm
Hydraulic pressure	210 bar	3045 psi
Power	5.3 kW	7.1 hp

Benefits:

- Suitable for Lamor 80 m hose package and for medium, large and offshore skimmers
- For vessel, barge and harbor installations
- Integrated 9 channel hydraulic rotary swivel
- Durable steel structure
- Container corners for locking and securing

* Please note that product configurations may impact on technical specifications.

** Please note! Hoses without hydraulic oil
