

The Rigid Manta Ray is a special weir suction head designed for oil recovery. The skimmer is suitable for thin oil slicks under relatively calm conditions where small debris is present in e.g. lakes and slow moving rivers.

The Manta Ray is a half-moon shaped flat suction head with several thin suction channels. The skimmer's top surface can be quickly opened while in operation to clear straw or small debris and closed to return the unit to efficient recovery of thin cuts of oil.

The standard delivery includes 2 pcs of 3" solid hose floats (refer to the photo on the left, no hoses included).

TECHNICAL SPECIFICATIONS

Diameter	1220 mm	48 in
Weight	11.8 kg	26.0 lbs
Capacity	26 m ³ /h*	43 gpm*
Suction Connector	3 in Camlock	

* Capacity related to pump selection

FEATURES AND BENEFITS

- Portable and light weight
- Easy to use
