Your Steel Service Center for
Bar, Tube & Pipe

Our Strength is Our Service!

Wisconsin Steel & Tube Corporation is an ISO 9001:2008 certified metal service center distributing ferrous and non-ferrous bar, tube and pipe products as well as offering value added services. Established in 1952, we are a privately-held corporation with over 70 employees committed to providing quality, competitively priced products with an unyielding focus on customer service and delivery performance. Our centralized location in Milwaukee, WI allows us to provide reliable, on-time delivery with our dedicated fleet of trucks. Our commitment to worker safety, conformance to strict quality control practices and our ability to meet the specialized requirements of our customers ensures that we will exceed expectations today, and in the future.

Your Steel Bar, Tube and Pipe Resource

- With our large facility totaling over 116,000 square feet, we are positioned well to stock not only our general product line, but also custom/engineered materials.
- Our Quality Assurance Department, headed by our on-staff metallurgist, maintains high quality levels for all products and processes. All our procedures are certified to ISO 9001:2008 standards.
- Wisconsin Steel & Tube is fully committed to meet the requirements of our customers to supply fully traceable steel products.
- We recognize that our customers must find innovative ways to cut costs to remain competitive, which is why we offer just-in-time (JIT) delivery. With JIT, your steel requirements will be available at the exact moment that they are needed.
- We offer a streamlined approach to inventory management and order fulfillment through vendor managed inventory (VMI). The goal of our VMI program is to provide a mutually beneficial relationship where both sides can more smoothly and accurately control the availability and flow of material.

Processing Applications To Meet Your Needs

We have the ability to supply our customers with products ranging from raw materials to semi-finished parts to fully processed components.

Our in-house capabilities include sawing (band saw, cold saw and modern cut-off) and de-burring services.

For machined and fabricated parts, Wisconsin Steel & Tube has the extensive outsourcing resources to meet our customers' needs. With one simple purchase order, we will manage your project.

If you would like to learn more about how Wisconsin Steel & Tube can help you please give us a call at **800-279-8335**.
