

Ocean Air Transportation authorized as Certified Cargo Screening Facility (CCSF)

Ocean Air Transportation www.oatinc.com an industry leader specializing in air, ocean and expedited ground shipments both domestically and internationally recently completed the process, with the Transportation Security Administration, to become a Certified Cargo Screening Facility.

The Transportation Security Administration has approved Ocean Air Transportation's application to operate under their requirements and regulations as a CCSF. This approval allows Ocean Air Transportation to screen air freight for their customers and deliver freight, as screened cargo to any airline or integrated carrier.

As part of a Homeland Security mandate, all air freight being transported must be screened at the 100% level. As a Certified Cargo Screening Facility, Ocean Air Transportation, must carry out a TSA approved security program and adhere to strict chain of custody requirements. Cargo must be secured from the time it is screened until it is placed on passenger aircraft for shipment.

As a benefit to our customers, this certification allows for efficient and cost-effective movement of any air freight, while helping to ensure the safety of the traveling public.

Successfully operating since 1986, the company is a privately held freight forwarding company, with its corporate headquarters located in Windsor Locks, Connecticut. At Ocean Air we specialize in the handling of air, ocean and expedited ground shipments both domestically and internationally. Our client base includes many major corporations in a myriad of industries around the globe including manufacturing and insurance companies, computer hardware manufacturers and resellers, office equipment suppliers, as well as tele-presence and robotics companies throughout the US.

We successfully collaborate with the operations groups, IT teams, and procurement staff to coordinate the delivery of their same day, next-day and even deferred deliveries with the care and expertise required to minimize damage, contain costs and meet the expected service levels.

As an extension of your logistics/supply chain teams, we become an essential component in your success - helping to meet production schedules, manage JIT inventories and exceeding lean manufacturing requirements.

We have the expertise to assist with the day-to-day demands all fast-growing, cost conscious organizations need. Truly, the strength of our service is the *strategy behind the move*.
