

## The IUI Opportunity Plan

*The only all-inclusive IUI treatment plan that includes both oral and injectable medications.*

In many cases, patients who are having trouble conceiving and achieving a successful pregnancy are treated with monitored ovulation induction and intrauterine insemination (IUI). These procedures are among the most widely used and successful treatment options in reproductive medicine. To help make sure that our patients can access the high-quality care they need, RMA of Connecticut offers **The IUI Opportunity Plan**. With The IUI Opportunity Plan patients at RMACT who do not have any insurance coverage can pay one price for up to three cycles of intrauterine insemination with oral and injectable medications.

### How The IUI Opportunity Plan works:

Eligible patients are treated for up to three cycles of monitored ovulation induction and intrauterine insemination with oral or injectable medications for a fee of **\$6,300**. This includes:

- IUI Education class ("Teach class")
- Initial baseline blood work and ultrasound to start your cycle
- Medications necessary for ovulation induction. Injectable gonadotropins added to treatment protocols in the last two cycles if applicable
- As many in-cycle monitoring appointments as your cycle requires (blood work and ultrasounds during morning monitoring hours)
- IUI Sperm preparations (one per cycle)
- Intrauterine inseminations (one per cycle)

Patient financing plans offered by some fertility centers try to reduce costs in many ways, such as not including any medications in their plan. Our plan treats each and every patient with the highest quality medical care and services including optimal doses of all medications to achieve a successful pregnancy.

### What is NOT included in RMACT's IUI Opportunity Plan

- All costs associated with the initial fertility work-up, including:
  - » Checklist blood work including any required follow-up testing
  - » Uterine Evaluation (HSG, SIS/SHG, hysteroscopy)
- Any outside monitoring
- Sperm freezing
- Pregnancy testing at the conclusion of each cycle
- Medical treatment subsequent to your IUI cycle such as a miscarriage, biochemical pregnancy or an ectopic pregnancy.
- Any fertility treatments beyond your third IUI cycle if you are not yet pregnant. The IUI Opportunity Plan is only for up to three cycles as noted above.

### Important Details regarding refunds

If you achieve a successful pregnancy at any stage during this treatment, the fee is non-refundable. You can withdraw from The IUI Opportunity Plan at any time.

If you choose to withdraw from the Plan after starting treatment, you will be refunded:

- After beginning the 1st cycle: **\$ 2,943**
- 2nd cycle: **\$ 500**
- 3rd cycle: **\$ 0 (no refund provided)**

If the RMACT clinical staff determines you are not a good candidate for The Opportunity Plan based on medical and laboratory findings, you will be withdrawn from the program and will receive:

- After beginning the 1st cycle: **\$ 3,455**
- 2nd cycle: **\$ 1,045**
- 3rd cycle: **\$ 0 (no refund provided)**

In most cases, patients who fail to become pregnant following three cycles of IUI with oral and injectable medication should consider treatment with In Vitro Fertilization (IVF). RMA of Connecticut also offers an IVF Opportunity Plan for patients who want an affordable option for high-quality treatment involving IVF.
