

COLLABORATION & TEAMWORK ASSESSMENT

EMBRACE COLLABORATIVE WORKING STYLES AND EMPOWER YOUR USERS WITH MICROSOFT TEAMS

The modern workplace is transforming business, our lives and the way we work. Widespread access to new technology is helping businesses become more productive and increasing engagement among employees. It is a catalyst for innovation and is unlocking new opportunities for growth.

Adopting a culture that empowers a collaborative working style in your business enables employees to work together efficiently to achieve shared goals. Companies that promote collaborative working have been shown to be five times more likely to be high performing; so creating an environment that encourages everyone to work together can have a positive impact on your team's performance. To achieve successful user adoption of new ways of working, businesses need to ensure that both their technical and cultural environments are ready for the change.

ACHIEVING SUCCESS

The modern workplace presents many challenges for teamwork: remote workers, off-site meetings, flexible schedules,

geographically-dispersed teams, multiple communication channels and ways of sharing files and information.

Microsoft Teams is a powerful hub for teamwork that brings together chat, video calling, files, and apps into a shared work space, making it easy to switch on the power of teamwork.

Core's Teamwork Assessment provides a structured approach to support your business in its journey towards a modern workplace. The assessment follows an iterative and agile method to gather and prepare requirements, review readiness, plan and design a basic solution to enable early testing. Experts from Core will work with your internal teams and end-users to build alignment, drive value and ensure desired outcomes are achieved in your business.

COLLABORATION & TEAMWORK ASSESSMENT

Core's Teamwork Assessment is for business and IT leaders and provides all the information you need to fast-track the success of your journey, creating an actionable roadmap that advises on the successful deployment, adoption and support of Microsoft Teams.

Realise the business value of Microsoft Teams

Identify cultural best practices for user adoption

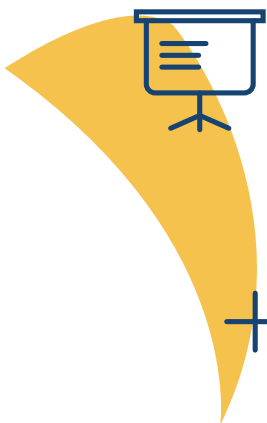

Deliver increased performance, improved productivity and reduced costs

TEAMWORK ASSESSMENT APPROACH

Core's Teamwork Assessment consists of two elements - a Business Decision Maker Workshop and a Planning Workshop on User Adoption and Change Management.

The Business Decision Maker workshop is designed to create an understanding among stakeholders of the results you can achieve through more effective teamwork by reviewing your existing collaboration tools and business goals.

This is a great starting point to provide clear and pragmatic insights into the business value of, and operational considerations for, a successful collaboration and teamwork transformation.

Business Decision Makers Workshop

Build a comprehensive plan with business and IT leaders. Identify and prioritise teamwork user case scenarios.

+ Planning Workshops

USER ADOPTION & CHANGE MANAGEMENT

- Build user case scenarios
- Develop an adoption strategy and success metrics
- Prepare plans for training, communication and resistance management
- Map personas and workloads
- Identify any issues or challenges
- Evaluate common scenarios and those that solve customer pain points
- Create custom deployment roadmap
- Finalise a plan for adoption, rollout and change reinforcement

NEXT STEPS

Core helps businesses realise the value and transformational impact of the Microsoft Office 365 solutions suite. Wherever you are on your Teams journey, we'd love to help you.
