RETAIL. SERVICE PROTECTION SCREENS.

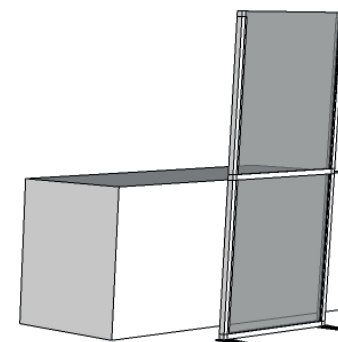

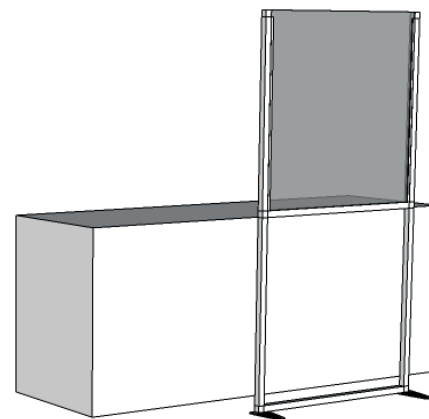

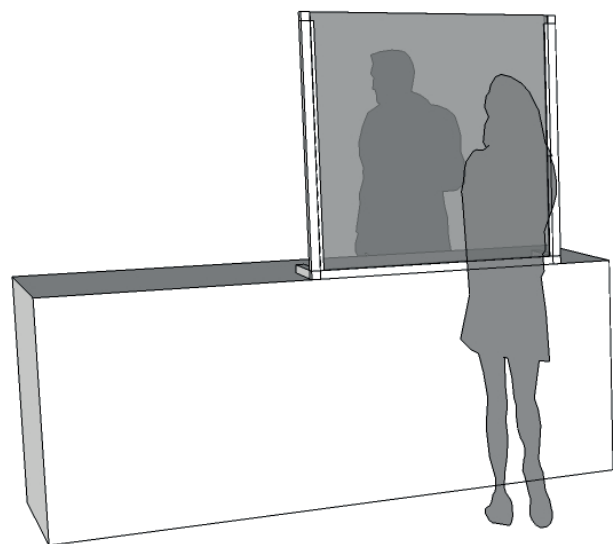

Designed and manufactured to combat the spread of Corona Virus (COVID-19) our Service Protection Screens allow the customer to see the retail staff and vice versa whilst also allowing the customer to pay electronically using the PDQ machines.

By installing this screen you are preventing the transmission of air particles between the customer and the till operator.

These screens will go a long way to reassuring your staff and protecting them during these uncertain operational times.

We also have a version available for self service checkout areas.

RETAIL. SERVICE PROTECTION SCREENS.

Physical
distancing,

Social
Connections.

RETAIL. SHOPPING COLLECTION PODS.

Designed and manufactured to combat the spread of Corona Virus (COVID-19) our Shopping Collections Pods allow the customer to collect pre-ordered and pre-paid shopping without face to face transaction. Staff would be positioned to monitor collections at specific times and restricted to the 2m social distancing rule.

These could be installed in shopping foyers or car parks to allow customers to collect without the need to leave their vehicles in high traffic or congestion zones.

These pods will go a long way to reassuring your staff and protecting them during these uncertain operational times and also offer customers an alternative to conventional shopping or online ordering.

RETAIL.

QUEUE DISTANCING BARRIERS.

Designed and manufactured to combat the spread of Corona Virus (COVID-19) our Queue Distancing Barriers allow retailers to ensure customers are kept within the social distancing rules of 2m for queues at entrances and checkout areas.

Wide enough to accommodate trolleys and baskets, they are reassuring customers and ensure potential customer conflicts are avoided.

They can be made to order and supplied to any specific dimensions. You may wish to graphic them to encourage extra health and safety measures or fix hand sanitisers to them to proceed shopping trolley and basket contact.

Physical
distancing,

Social
Connections.

RETAIL.

RESTOCKING BARRIERS.

Retailers are seeing huge demands for consumable goods and restocking in large volumes can no longer follow the traditional methods during operational hours. Retailers need the flexibility to partition areas and aisles to complete palletised restocks without the risk of injury to customers.

Using our new restocking barriers is a fast and efficient method to control customer footfall in areas that need replenishing with products. Available in a range of sizes we're certain we will have a solution to fit your retail operation.

RETAIL. SOCIAL DISTANCING FLOOR STICKERS.

Designed and manufactured to combat the spread of Corona Virus (COVID-19) our Social Distancing Floor Stickers allow retailers to ensure customers are kept within the social distancing rules of 2m for queues at entrances and checkout areas.

They can be made to order and supplied to any specific dimensions. You may wish to use them alongside queue management barriers or simply position them in front of counters to manage how close customers get to staff and service areas.

Pick from one of our existing designs or have a bespoke sticker created to match your brand guidelines.
