SilverBlaze is currently accepting applications for a **Java Web Developer** to join our team. We are enthusiastically building our company and the successful candidate will be able to demonstrate through their resume and a supporting portfolio that they are strong in the following skills:

Required Qualifications:

- HTML 5
- CSS 3
- JavaScript / JQuery
- Bootstrap
- AJAX
- Digital imaging and illustration with CS5 or higher
- Content management skills

What You Will Be Doing:

- Design and Develop Responsive web sites using Bootstrap
- Image creation and editing
- Perform layout updates using CSS
- Write flexible, well-commented code with an eye for growth and longevity
- Develop and maintain websites utilizing up-to-date coding standards

What You Need for this Position:

- BS degree in Computer Science or Information Technology (or related field)
- One to three years of web development experience
- MUST have experience designing web pages, with a portfolio to demonstrate web design projects and associated skills
- Experience in implementing websites into CMS related online systems
- Strong creative and conceptual abilities
- Ability to work in a fast paced environment with multiple projects at one time
- Understanding of different browsers and cross-browser compatibility (IE, Firefox, Safari, Chrome, etc.)
- A basic understanding of internet marketing is ideal
- Strong interpersonal presentation and communication skills
- Willingness to learn and the ability to self-teach.

Why Work at This Company?: Fast-growing company, family-friendly atmosphere; pizza pay-days, annual summer cottage retreat, flexible environment, room for growth!

Hiring Company Description: An established business since 1999, SilverBlaze is a Toronto-based, independent software vendor behind the creation & development of the award-winning SilverBlaze Customer Portal software. SilverBlaze provides web solutions to utility providers worldwide. The SilverBlaze Customer Portal is an aggressively priced suite of web self-service and web commerce modules, for managing utility customer activities including Smart Forms, a powerful and flexible software platform for creating workflow applications, as well as automating and managing business processes and approvals.
