

Convert and Archive Legacy System Data

As healthcare organizations connect, merge, and acquire other health systems, a major consideration is what to do with legacy system data. Historical data is imperative to providing patient care, and legacy data must be converted to the new system or archived to ensure continuity of care.

Nordic and Galen Partnership

Nordic has partnered with Galen Healthcare Solutions to provide data conversion and archival solutions for clients extending their electronic medical record to their partners. Nordic selected Galen as our exclusive partner because of their proven experience with data conversion and archival across multiple products, the quality and depth of their solution offerings, and a focus on superior customer service.

Together, Nordic and Galen offer a variety of solutions for clients to convert legacy data or archive legacy systems, including:

- ▶ Continuity of Care Document (CCD) conversion
- ▶ Unique, tiered conversions based on data elements and years requested
- ▶ Full archival to Galen's SaaS-native VitalCenter Online platform designed for the cloud, allowing for elastic scalability and continuous feature delivery

Legacy Data Best Practices

Retire Legacy System

- Eliminate costs of maintaining both legacy and new system
- Improve provider satisfaction and data accessibility

Data Migration

- Convert a subset of data from legacy system(s) to ensure continuity of care
- Minimize provider disruption with access to legacy data in new system

Archive Data into VitalCenter Online

- Archive all data to satisfy legal retention requirements
- Data is easily accessible in new system with one click

The Nordic and Galen Difference

Experienced leadership

Nordic's Affiliate Solutions team has over 65 years of Epic experience and over 30 years of Epic extension experience. An affiliate engagement advisor leads each affiliate solution to ensure success.

Galen's expertise

For over a decade, Galen has partnered with specialty practices, hospitals, health information exchanges, health systems, and integrated delivery networks to provide data conversion and archival solutions. The KLAS report, Legacy Data Archiving 2019, recognized Galen for its industry-leading commitment to customer experience. The report stated "Galen has the highest percentage of customers who report high satisfaction" with a tool that is "exceptionally easy to use."

360-degree insight

As well as working with organizations extending Epic, we also work with health systems receiving Epic via a Connect program.

CARE DOCUMENTS

Galen was an instrumental strategic partner in navigating us through data migration and archival planning, scoping, and best practices. Their team enabled continuity of care for our providers and facilitated successful retirement of our legacy EMR system as part of our Connect implementation. I recommend Galen to any healthcare system that needs support with their Connect transition.
