CYMMETRI

Intelligently handle the problems & challenges of identities and their accesses in the 21st Century.

Enterprise identities have evolved beyond standard user accounts.

Get a consistent, overarching view of identities inside and outside your organization with Cymmetri and ensure that only the right people get secured access to the right data or platform at the right time.

WORKFORCE IDENTITY MANAGEMENT

- Empower people and machines with right roles, permissions, and governance.
- Allow unprecedented interoperability in your business environment making it highly scalable and agile.

CONSUMER IDENTITY ACCESS MANAGEMENT

- Create a homogenous, single view of your consumer from across disparate user stores within your enterprise.
- Offer consistent, multi-channel personalization with risk-score backed, adaptive multi-factor authentication.

IDENTITY GOVERNANCE

- Make user governance easy and efficient by enabling detailed and fully customizable dashboards for the CEO, CFO and CIO's teams as per the needs.

Business Benefits

- Central view of all users, groups and role information.
- Automated reporting of users' access patterns and access review requests.
- Offline multifactor authentication using the time-based OTP application.
- Workflow engine to automate processes and reduce manual workload.
- Provide compliance to user auditing practices using access governance.
- Mitigate excessive access using automated revocation process.

KEY FEATURES OF CYMMETRI

- Provides Identity Management including n-tier organizational structure.
- User management through sources such as LDAP and Active Directory, with synchronization and reconciliation.
- Identity Governance using provisioning, de-provisioning, certification and recertification of user access.
- Single Sign On using OpenID Connect, SAML and custom Token API for legacy applications.
- Multifactor Authentication through Time-based OTP, SMS OTP, Email OTP and Push Notifications (via Cymmetri Mobile Application – currently available on Android).
- Social sign-in with 20+ social identity providers including Facebook, Google, Github etc.
- Automatic user creation in Customer Data Platform with social login provider information (if available).
- Consent management using application scopes.

About Unotech

We are the experts in Identity Management, Business Process Automation, and Digital Transformation.

Registered under the Startup India initiative of Department of Industrial Policy & Promotion (DIPP), Government of India, we work closely with key corporates, including leading banking & financial institutes and manufacturing companies, offering Open Source products and services.

We have developed two enterprise technology products – Cymmetri, a flagship product that enables and manages organizational Unified Digital Identity, and Felicity, a business process automation platform that complements Cymmetri as its subsystem.
