We brought Craigs Investment Partners into the future with an activity based workplace that welcomes and inspires its people and clients.

Craigs Investment Partners is a specialist private wealth investment manager, with a broad range of portfolio management, broking services and saving solutions. They engaged Unispace to transform their existing space in Auckland to a bright, flexible and open environment to welcome their clients and inspire their team.

With sweeping harbour views, the design aesthetic plays to the New Zealand landscape, with warm, rich colour tones and timber finishes throughout, providing a stylish, elegant look.

Team members and clients are welcomed into the new look front of house area which frames the views below. A bespoke fabric paneled operable wall is adjacent to the boardroom, offering the flexibility to open up for client events and conferences when needed.

We reconfigured the existing space to maximise exposure to natural light within the workplace through glass partitions and clever space planning.

Supporting wellbeing, the staff breakout is also complemented by the panoramic backdrop for team members to enjoy. Sit-to-stand workstations promote movement and a range of ABW facilities enable variety and choice, including stand up meeting rooms, focus booths and client facing meeting rooms supported by integrated technology. Different rooms display local art, with a mix of materials and finishes selected to offer a unique personality to different spaces, supporting the behaviours intended there.

Our Delivery team ensured minimal disruption to daily operations through careful planning and programming, delivering the project on time and within budget. Working hand in hand, our Design and Delivery teams successfully transformed Craigs Investment Partners into a flexible, bright and stylish workplace for team members and clients to enjoy.
