Hilton

Sharing Indulgent Moments with the Hilton

Hilton Garden Inn Luton North

Generating Fantastic Earnings

The Hilton Garden Inn needed an additional **WMF 1500 S** for their self-serve area. Their first machine had been a big hit with customers and staff alike as every single cup was freshly prepared to the customer's requirements. The Hilton were also delighted with the cash flow generated from the machine, leading to increased revenue.

200 People a day using the coffee machine

Self-serve Area

157 Bedrooms within the hotel

Using 12oz cups

x2 Two bean options, Normal & Decaf

“

The new machine is easy to use due to the intuitive user interface, offers good taste with a consistent high quality and is easy to clean.

Dynamic Milk System

Provides hot and cold milk and foam from the fully automated beverage spout.

Telemetric Capacity

Access important data whenever, wherever so you can control counters and event notifications.

Self Service

A guided step by step for each beverage, starting with cup size, normal or decaf etc. It's child's play.

Automatic Cleaning

Simple and effective, inserting a cleaning tablet is the only action needed to clean your machine.

Masterful Enjoyment - In Every Perfect Beverage...

With the choice of two bean options of normal and decaf coffee guests, staff, clients and nearby airport staff now have the pleasure of high-quality coffee in every cup!

These moments of indulgence are greatly appreciated by the hotel as it fits perfectly into their self-serve area and the generated cash flow ensures everyone remains happy with their favourite cup of coffee.

1 Dynamic Milk provides hot and cold milk, hot and cold milk foam – fully automated via the beverage spout.

2 Telemetric capacity via the Remote Data Access option, you are able to access important data whenever you want, e.g. for controlling beverage and service counters, error and event notification.

3 Self-service Area Beverage options can be requested by the guest via the "Post Selection" function on the display. They are guided step by step through the individual beverage options (cup size, with or without caffeine etc.) and crowned with the fully automatic preparation of their desired drink. All options can, of course, be independently set according to beverage specification.

9 Illuminated Panels The illuminated side panels flash when action is required (e.g. when the coffee beans need refilling).

4 SteamJet brings every cup to the correct temperature in a matter of seconds.

5 On Screen Advertising You can use the customer's time and attention whilst their beverage is prepared for on screen advertising in the self-service area.

12 Touch display with clear menu structure. The "digital operating manual" is self explanatory and provides information about current operation status via the automatic messages on the display.

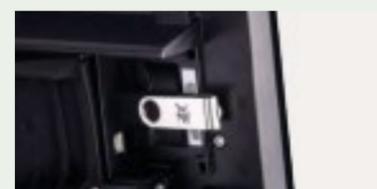

6 Easy maintenance You will be able to carry out yourself. Making your machine a rare sight for the WMF service technician.

7 Automatic Cleaning Automatic cleaning is activated via the touch display. Inserting a cleaning tablet is the only action required.

8 Compact Design With its impressively sleek dimensions, this head-turner makes room for additional coffee machines or add-on-devices.

14 Data Backup Software updates and cleaning protocol downloads.

10 Customisable Layouts There is the option of customising keypad layouts using different key arrangement and number of keys, as well as various colours, backgrounds and transparencies. For example, in the self-service area, you might select a single-tier self-service layout. You can even upload and insert your own beverage images, backgrounds or keypad layouts.

13 Eight beverage buttons over six levels enable up to 48 beverages in either single or double-sized cups to be programmed. Recipes and pictures are also loggable.

15 Flexible Milk can flexibly be supplied from either left or right side, or underneath.

11 Via the Timer Function the coffee machine can turn itself on and off at freely selected times. Some functions and beverages can be activated and deactivated. Simple switching from service to self-service, from beverages with fresh milk to topping powder (depending on configuration).

16 Practical Small-Medium-Large functions (SML) simply match each desired beverage to the various predefined filling volumes.
