

10 WAYS

an ePOD system
IS VITAL TO YOUR DELIVERY
business

1

Increased accuracy and efficiency

through fast, secure electronic data management.

2

Real time communication and tracking,

keeping your transport team up to date with the latest situation without distracting the driver.

3

Improved customer service

knowing the latest delivery movements means customer queries can be answered rapidly.

4

Improved cash flow

thanks to earlier confirmed deliveries enabling earlier billing.

5

Cost savings

on printing and paper document storage.

6

Reduces the need for manual data entry,

allowing you to free up resources for proactive customer service and management.

7

Faster dispute resolution,

thanks to trusted electronic records of every delivery making it easier to manage claims for missing and damaged deliveries.

8

Minimising customer queries

by keeping them in the loop with delivery documents to be automatically emailed to your customer once a delivery is complete.

9

Empowers your staff,

letting them monitor any schedule changes via the browser-based ePOD enquiry screen and giving them the opportunity to alert customers when necessary.

10

Seamlessly integrates

with compatible warehouse and transport management systems.

Our CALIDUS ePOD is flexible to suit you

It is compatible with ERP, TMS and WMS systems, and can be provided as an on-premise basis or as a hosted service from our UK solutions centre.
