Tips and Tricks for Social Media

Hashtags are a great way to expand your following. Try adding hashtags to the end of your post like #YourPracticeName, #VirtualDispensary, #Wellevate, #Health, and #Supplements.

On **Instagram**, you aren't able to add links in post copy. Instead, add your Wellevate URL to your page bio in Account Settings and reference it in the post, saying "Create an Account! Link in bio."
