

# SU-5E Desk Mounting Case

## SPECIFICATION

The Enlighted SU-5E Desk Mounting Case provides a flexible solution for mounting the SU-5E Micro Sensor to the underside of a desk or table. Easy to install, the case securely supports the sensor and routes the sensor cable from the side of the case.

### OVERVIEW

The Enlighted SU-5E Desk Mounting Case is comprised of a mounting bracket, separate sensor carrier that is specifically designed for the SU-5E Micro Sensor, and blinder. The bracket holds the Micro Sensor inside the carrier securely. The blinder cover restricts the sensor's field of view to avoid false detection of motion near the desk. The mounting bracket comes with the following installation options:

- Adhesive tape to hold the mounting case to the desk.

The sensor must be connected to a low voltage power source. The available cabling options are:

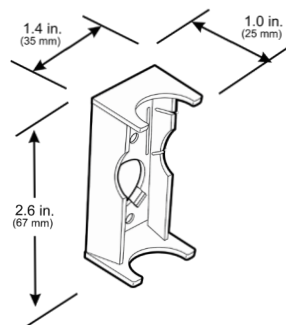

- A USB cable with Type-A connector
- Two-wire cable with DALI power supply
- Two-wire cable with separate power supply (PWR-NF)

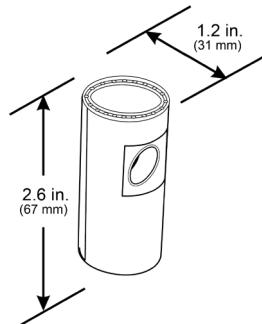

SU-5E Mounting Bracket

L	2.6"	67 mm
W	1.4"	35 mm
