## Our Services

### ENTERPRISE ASSET MANAGEMENT

**Maintenance Excellence Capability:** We help your business improve its maintenance strategies and achieve excellence in maintenance and asset management processes.

**Data Standards:** We fix data inconsistency by establishing clear and fit for purpose Data Standards.

**Data Remediation:** We cleanse & organise your data and ensure that you have the right tools and processes in place to keep your data in good shape.

**Smart Inspections:** SAP Quality award winning, best of breed solution for efficiently recording detailed engineering inspections in SAP.

**Intelligent Asset Management:** SAP's next generation cloud based offering which uses machine learning and real-time data from IOT to bring intelligence to your maintenance.

**Sigga:** SAP Certified Mobile EAM application that enables your business to perform more work in less time and enhances the quality and accessibility of data.

### UiPath – ROBOTIC PROCESS AUTOMATION

**UiPath:** We are the natural leaders in the intersection where RPA meets SAP - providing bespoke improvements to your repetitive, high frequency processes.

## Our Approach

We help to ensure alignment between **PEOPLE,** **PROCESS** & **DATA** in SAP and drive **EFFICIENCIES** and **GOVERNANCE** for sustainable **EXCELLENCE**.

Business > SAP > Data > Automation > Analytics

A wealth of business and functional experience

# Our Clients

> Thank you for making our dream a reality.  It was great working with you guys, the pragmatism and honesty throughout the design rather than simply agreeing that all things were possible you and your team clearly stated what would be the easy, effective solution and reigned us back from expensive, complicated potentially unusable solutions.
