

COVID-19 Basic Infection Prevention Measures

COVID-19, caused by a new coronavirus, is a respiratory illness that can spread from person to person. The following infection prevention measures may help prevent transmission on construction job sites.

	Stay home if you are sick. DO NOT WORK.
	Wash hands frequently or provide alcohol-based hand rubs containing at least 60% alcohol.
	Cover coughs and sneezes.
	Practice social distancing — try to maintain SIX feet between each worker.
	Wear face covering (cloth, bandana, etc.) <u>or</u> mask over nose and mouth to prevent spread of virus.
	Reduce the size of any group at any one time to 10 people or fewer or LIMIT all in-person meetings.
	Minimize ride-sharing. While in vehicle, employees must ensure adequate ventilation.
	Avoid sharing tools with co-workers, if possible.
	Clean and disinfect frequently used tools, equipment, and frequently touched surfaces (door handles, handrails, machinery controls, cell phones, tablets) on a regular basis.
	If N95 respirator masks are not available, minimize dust and airborne contaminants by using engineering and work practice controls.
	Use proper personal protective equipment (PPE) when cleaning and disinfecting, such as gloves and eye protection.
