INDUSTRIAL

AIR SYSTEMS NZ

At Industrial Air Systems we have the systems in place to keep your compressed air equipment running reliably and at peak efficiency! With full time service coordinators and managers on staff, we make things happen! Customers taking advantage of our preventative maintenance programs are satisfied customers and experience increased productivity.

PREVENTATIVE MAINTENANCE ADVANTAGES

- ✓ Minimizes or eliminates unscheduled downtime and increases profitable uptime
- ✓ Optimizes your equipment so it always operates within specifications and at peak performance
- ✓ Reduces unnecessary repairs
- ✓ Reduces depreciation of capital investment caused by poor equipment maintenance
- ✓ Reduces rework of production due to your compressed air equipment running at less than optimal operation
- ✓ Reduces excessive power consumption as a result of efficient equipment performance—saves money on energy requirements that could exceed the cost of maintenance
- ✓ Reduces the need for standby equipment—less capital investment required for equipment or plant

“With full time service coordinators and managers on staff, we make things happen!”

THE ELITE SERVICE TEAM FIVE POINT PLEDGE TO YOU

- ✓ We will be on site as notified by one of our service team members. Although some rescheduling may be necessary as a result of customers needing emergency service, you will always be notified through your preferred communication method of the updated schedule.
- ✓ Not only will the machine be serviced and/or repaired to operate better than when we arrived, but it will look better as well. Keeping the machine clean allows it to run more efficiently and reduces future maintenance and diagnostic time.
- ✓ A majority of all issues will be addressed during our first visit to your site. This is possible with factory trained service technicians with efficiently stocked service vehicles.
- ✓ No matter the brand or type of compressed air equipment you have, our service technicians are knowledgeable service technicians and will inspect and advise on the overall condition of your system.
- ✓ Upon completion of the service, you will be informed as to what issues were addressed and what measure should be taken, to prevent the issue from recurring. All service is always documented and kept on file for trend reporting and review.

CHECKLIST POINTS

Inspect:

- ✓ Intake Filter Housing
- ✓ Air & Oil Cooler
- ✓ Electrical Connections
- ✓ Starter Contacts
- ✓ Belts
- ✓ Drive Coupler
- ✓ Vibration Mhz
- ✓ Safety Devices
- ✓ Pressure & Temperature Gauges
- ✓ Main Fasteners
- ✓ Drain Valves
- ✓ Covers & Guards
- ✓ Scavenge Line
- ✓ Air & Oil Leaks

Record:

- ✓ Load/Unload Pressures
- ✓ Separator Differential Pressure
- ✓ Ambient Temperature
- ✓ Loaded Discharge Temperature
- ✓ Injection Coolant Temperature
- ✓ Motor Nameplate Amps
- ✓ Motor Nameplate Service Factor
- ✓ Load/Unload Amps
- ✓ Load/Unload Voltages

Replace:

- ✓ Intake Filtration
- ✓ Oil Filtration
- ✓ Air/Oil Separators
- ✓ Cabinet Filtration
- ✓ Belts
- ✓ Lubricants

0800555018

- 1. Rotary Screw Compressor
- 2. Compressed Air Receiver
- 3. Compressed Air Dryer

- 4. Inline filtration
- 5. Auto Condensate Drains
- 6. Water - Oil Separator

- 7. Compressed Air Piping / Reticulation

Air Compressor Equipment

- Piston Air Compressors
- Rotary Screw Air Compressors
- Oil-Free Air Compressors
- Variable Speed Drive Air Compressors

Service/Parts Department

- On-site Repairs & Service
- Replacement Filter Elements
- Lubricants
- Rebuild Kits
- Much more...

Compressed Air Treatment

- Refrigerated Air Dryers
- Desiccant Air Dryers
- Membrane Air Dryers
- Inline Filtration

Preventative Maintenance Programs

- Gold Guarantee
- Silver Guarantee
- Bronze Guarantee
- Master Maintenance

Compressed Air Accessories

- Filter/Regulator/Lubricators
- Hose Reels
- Quick Coupling Fittings
- Blow Guns & Much more...

Installations

- New Equipment 'Swap-outs'
- Complete Turnkey Systems
- Plan distribution piping
- Aluminum Piping Systems
- Compressor Room Ventilation
