

Financing Options

SunPeak can arrange a variety of financing structures to suit your specific circumstances and needs. The following provides an overview of the primary financing mechanisms for a commercial solar installation:

1. **Cash.** Customer pays cash for their system.
2. **Solar Loan.** Customer borrows a portion, or all, of the required capital.
3. **Power Purchase Agreement (PPA).** A third-party investor finances and owns the system, and sells electricity to the customer over a PPA term at a preset energy rate (\$/kWh).

	Cash	Solar Loan	PPA
Direct Ownership
