TASTE/SCENT

BERRY PINE SWEET GRAPE

DESCRIPTION

Granddaddy Purple is a famous indica cross between Purple Urkle and Big Bud. This California staple inherits a complex grape and berry aroma from its Purple Urkle parent. Its potent psychoactive effects are clearly detectable in both mind and body, delivering a fusion of cerebral stimulation coupled with strong, classic indica effects.

PARENT #1: PURPLE URKLE

Indica-Dominant Hybrid

Breeder: Unknown

Lineage: Mendo Purps

The introduction of this strain can be dated back to late 1980s. This is a Californian strain which is often considered a classis. Purple Urkle is identified by its purple flowers covered by orange hairs. The aroma of this strain is skunky with light hints of fruity aroma.

PARENT #2: BIG BUD

Indica

Breeder: The Seed Bank

Lineage: (Big Bud x NL#1) x Big Bud

Big Bud is an indica strain that was the overall winner of the 1989 High Times Cannabis Cup. It was named for having enormously oversized buds. The flowers are covered in a fine layer of white crystal trichomes and visible sweet resin. Big Bud has a sweet and spicy aroma with a grape aftertaste.
