TASTE/SCENT

GAS HERBAL CITRUS PEPPER

DESCRIPTION

A truly classic cannabis strain that has just as much staying power now that it did when it was accidentally bred into existence in Boca Raton, FL and grown for the first time in Orlando, FL. Triangle Kush takes its name from a strain known as Emerald Triangle crossed with the pollen of a Hindu Kush male. This strain has been the backbone of so many of the strains we know and love. It was chosen because of its truly rare genetics, insane bag appeal, and classic Myrcene and Beta-Caryophyllene terpene profile. If you like cannabis, you will probably like this strain.

PARENT #1: Emerald Triangle

Unknown

Breeder: Unknown

Lineage: Unknown

PARENT #2: Hindu Kush

Indica

Breeder: Sensi Seeds

Lineage: Hells OG x Jack the Ripper

This pure Indica seed-strain originates in the Hindu Kush - a mountain range that has been home to legendary cannabis varieties for centuries. Potency is medium-to-high with the mellow, happy body vibration possessed by the classic Indica strains. Hindu Kush also imparts a calm, contemplative mental state.
