

Trinitas Christian School

A Classical and Christ-Centered Education

COVID19 Response Plan (Updated)

Trinitas continues to get daily updates from the CDC, the Florida Department of Health, and the Escambia County Health Department regarding the spread of the virus and recommended or mandated action for schools. None of those authorities is mandating or even recommending school closure at this time. Neither do the board and administration see a need to close the school; however, the school is finishing its plan for the possibility of a long term closure. If the school needs to close, we will continue to deliver instruction. Details for accomplishing that will be released if closure becomes necessary.

In the meantime, the school is continuing to

- Get daily updates from CDC, the Florida Department of Health, and the Escambia County Health Department
- Disinfect classrooms and common areas daily
- Increase the frequency of student handwashing
- Evaluate all information coming out of Washington DC so we can make a good decision regarding our upcoming aesthetics trip to that area

We serve a sovereign God who gave us good brains to think with; therefore, we don't want to panic but to thoughtfully prepare.
