

Quickstart Guide

Roll Off

For the initial startup you need a **Wi-Fi network** (have the network name and password available) and a Bluetooth enabled mobile phone.

Keep a 3 foot clearance in front of gita for it to roll off.

1

Charge gita for 10 minutes

Remove the charger from the accessories tray and plug the charging cable into the charging port at the back of gita and the power cable into a wall outlet.

2

Install the mygita app and create your account

While gita is charging, download the mygita app from the App Store or Google Play Store. Sign up and create your account. During the account creation you will be sent an email with a verification code. After uploading your profile picture, select the option "I bought a new gita".

3

Power on gita

Press and release the power button above the charging port.

4

Continue setting up the app

Scan the barcodes to the right.

Single use only

5 Identify your gita

After a short online registration process you can give your gita an app specific name.

6 Connect gita to your Wi-Fi network

Should you have trouble connecting to a network, please contact Customer Care at [1-800-791-0843](tel:1-800-791-0843).

7 Confirm clearance in front of gita

gita needs at least 3 feet of clearance in order to roll off the base.

8 Initiate the roll off

Unplug the power cable from the back of gita to initiate the roll off.

9 gita is ready for a first walk!

Your first walk with gita

- 10 To get started, touch the small *Ready/Park* button . gita will stand up and self-balance.
- 11 Now, standing in front of gita, touch the large *Pair/Unpair* button . gita will follow you.
- 12 To end your walk touch the *Pair/Unpair* button  again and gita will stop following you. To park gita, touch the small *Ready/Park* button  and gita will sit down.

To continue your journey with gita, make sure to read the user manual. It covers the mygita app, gita in detail, safety instructions, tips for a respectful operation, and a list of helpful FAQs.
