FAQs

What's the catch?

You have to commit to the innovation effort by September 1 and agree to allow TechSolve to complete an impact survey to measure the benefit to your business. The training & work can run beyond Sept 1.

How & when do you decide who gets the funding?

The pace of innovation doesn't wait, and neither do we. TechSolve and Eureka! will evaluate each request in real-time and attempt to get back to you with a response within a week.

Are there other options for using this funding?

Yes, we have many different ways you can use the funding for innovation. Just reach out to us and we can create a custom plan for you.

Why are they giving money to Ohio manufacturers with less than 250 employees?

Innovation is important in every industry for growth and to create new jobs. However sometimes great innovation services are financially out of reach for smaller companies. This grant gives smaller organizations the funding they need to take a meaningful stride toward adding innovation capability to their toolset - and make a meaningful impact to their business and community.

What if I'm not sure if I'm a manufacturer or not?

Just contact us and we'll check to see if your organization qualifies. There are some other categories that also qualify.

What if I want to keep doing innovation work but it goes beyond this funding?

This grant award amount is up to \$25,000 per company. However, that does not mean you need to limit your innovation work. Contact us to craft an innovation solution that's best for you.
