## Checklist **Business Pandemic: Influenza Planning**

In the event of pandemic influenza, businesses will play a key role in protecting employees' health and safety as well as limiting the negative impact to the economy and society. Planning for pandemic influenza is critical. To assist you in your efforts, the Department of Health & Human Services and the Centers for Disease Control and Prevention have developed the following checklist for large businesses. It identifies specific activities large businesses can do now to prepare, many of which will also help you in other emergencies.

1. Plan for the impact of a pandemic on your business:	DONE	PROGRESS	STARTED
Identify a pandemic coordinator and/or team with defined roles and responsibilities for preparedness and response planning. The planning process should include input from labor representatives.			
Identify essential employees and other critical inputs (e.g. raw materials, suppliers, sub-contractor services/products, and logistics) required to maintain business operations by location and function during a pandemic.			
Train and prepare ancillary workforce (e.g. contractors, employees in other job titles, retirees).			
Develop and plan for scenarios likely to result in an increase or decrease in demand for your products and/or services during a pandemic (e.g. effect of restriction on mass gatherings, need for hygiene supplies)			
Determine potential impact of a pandemic on company business financials using multiple possible scenarios that affect different product lines and/or production sites.			
Determine potential impact of a pandemic on business-related domestic and international travel (e.g. quarantines, border closures).			
Find up-to-date, reliable pandemic information from community public health, emergency management, and other sources and make sustainable links.			
Establish an emergency communications plan and revise periodically. This plan includes identification of key contacts (with back-ups), chain of communications (including suppliers and customers), and processes for tracking and communicating business and employee status.			
Implement an exercise/drill to test your plan, and revise periodically.			
2. Plan for the impact of a pandemic on your employees and customers:	DONE	IN PROGRESS	NOT STARTED
Forecast and allow for employee absences during a pandemic due to factors such as personal illness, family member illness, community containment measures and quarantines, school and/or business closures, and public transportation closures			
Implement guidelines to modify the frequency and type of face-to-face contact (e.g. hand-shaking, seating in meetings, office layout, shared workstations) among employees and between employees and customers (refer to CDC recommendations)			
Encourage and track annual influenza vaccination for employees.			
Evaluate employee access to and availability of health care services during a pandemic, and improve services as needed.			
3. Establish policies to be implemented during a pandemic:	DONE	IN PROGRESS	NOT STARTED
Establish policies for employee compensation and sick-leave absences unique to a pandemic (e.g. non-punitive, liberal leave), including policies on when a previously ill person is no longer infectious and can return to work after illness.			

Establish policies for flexible worksite (e.g. telecommuting) and flexible work hours (e.g. staggered shifts).			
Establish policies for preventing influenza spread at the worksite (e.g. promoting respiratory hygiene/cough etiquette, and prompt exclusion of people with influenza symptoms).			
Establish policies for employees who have been exposed to pandemic influenza, are suspected to be ill, or become ill at the worksite (e.g. infection control response, immediate mandatory sick leave).			
Establish policies for restricting travel to affected geographic areas (consider both domestic and international sites), evacuating employees working in or near an affected area when an outbreak begins, and guidance for employees returning from affected areas (refer to CDC travel recommendations).			
Set up authorities, triggers, and procedures for activating and terminating the company's response plan, altering business operations (e.g. shutting down operations in affected areas), and transferring business knowledge to key employees.			
4. Allocate resources to protect your employees and customers during a pandemic:	DONE	IN PROGRESS	NOT STARTED
Provide sufficient and accessible infection control supplies (e.g. hand-hygiene products, tissues and receptacles for their disposal) in all business locations.			
Enhance communications and information technology infrastructures as needed to support employee telecommuting and remote customer access.			
Ensure availability of medical consultation and advice for emergency response.			
5. Communicate to and educate your employees:	DONE	IN PROGRESS	NOT STARTED
Develop and disseminate programs and materials covering pandemic fundamentals (e.g. signs and symptoms of influenza, modes of transmission), personal and family protection and response strategies (e.g. hand hygiene, coughing/sneezing etiquette, contingency plans).			
symptoms of influenza, modes of transmission), personal and family protection and response
